

# Variant FCC RF Test Report

**APPLICANT** : DAP Technologies  
**EQUIPMENT** : Rugged Mobile Tablet Computer  
**BRAND NAME** : DAP  
**MODEL NAME** : 9000WBWV1  
**MARKETING NAME** : M9010  
**FCC ID** : T5M9000WBWV1  
**STANDARD** : FCC Part 15 Subpart C §15.247  
**CLASSIFICATION** : Digital Transmission System (DTS)

The product was integrated the WLAN Module (Brand Name: Summit Data Communications / Model Name: SDC-PE15N, FCC ID: TWG-SDCPE15N) during the test.

This is a variant report which is only valid together with the original test report. The product was received on Jul. 07, 2011 and completely tested on Sep. 19, 2011. We, SPORTON INTERNATIONAL INC., would like to declare that the tested sample has been evaluated in accordance with the procedures given in ANSI C63.4-2003 and shown the compliance with the applicable technical standards.

The test results in this report apply exclusively to the tested model / sample. Without written approval of SPORTON INTERNATIONAL INC., the test report shall not be reproduced except in full.

**Remark:**

1. For other wireless features of this EUT, test report will be issued separately.
2. This test report recorded only product characteristics and test results of Digital Transmission System (DTS).
3. The above EUT's information was declared by manufacturer. Please refer to the specifications or user's manual for more detailed description.

## 1.5 Applied Standards

According to the specifications of the manufacturer, the EUT must comply with the requirements of the following standards:

- FCC Part 15 Subpart C §15.247
- FCC KDB Publication No. 558074 (Measurement Guidelines of DTS)
- ANSI C63.4-2003

**Remark:**

1. All test items were verified and recorded according to the standards and without any deviation during the test.
2. This EUT has also been tested and complied with the requirements of FCC Part 15, Subpart B (DoC), recorded in a separate test report.

## 1.6 Ancillary Equipment List

| Item | Equipment          | Trade Name | Model Name | FCC ID      | Data Cable        | Power Cord   |
|------|--------------------|------------|------------|-------------|-------------------|--|
| 1.   | Mouse              | Logitech   | M90        | FCC DoC     | Shielded, 1.8 m   | N/A  |
| 2.   | (USB) Mouse        | DELL       | MOC5UO     | FCC DoC     | Shielded, 1.8 m   | N/A  |
| 3.   | iPod Earphone      | Apple      | N/A        | FCC DoC     | Unshielded, 1.2 m | N/A  |

| 7.   | Notebook           | DELL       | P20G       | FCC DoC     | N/A               | AC I/P:<br>Unshielded, 1.2 m<br>DC O/P:<br>Shielded, 1.8 m |

## 2 Test Configuration of Equipment Under Test

### 2.1 Test Mode

The EUT has been associated with peripherals pursuant to ANSI C63.4-2003 and configuration operated in a manner tended to maximize its emission characteristics in a typical application. Frequency range investigated: radiated emission (30 MHz to the 10th harmonic of the highest fundamental frequency or to 40 GHz, whichever is lower).

Pre-scanned tests, X, Y, Z in three orthogonal panels, were conducted to determine the final configuration from all possible combinations, laptop / tablet modes.

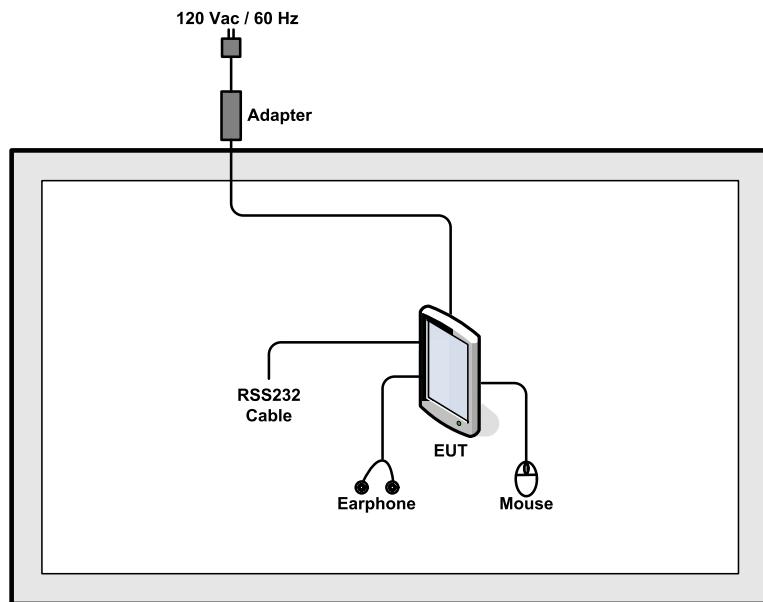

The following table is showing the total pre-scanned test modes, and the worst modes (E2 plane) are recorded in this report only.

| Test Cases                  |   |
|-----------------------------|---|
| Test Item                   | 802.11b (Modulation : DSSS)                                 |
| Radiated<br>TCs             | Mode 1: 802.11b_CH11_2462 MHz                               |
| AC<br>Conducted<br>Emission | Mode 1 : WLAN Link + Bluetooth Link + TC + Adapter + GPS Rx |

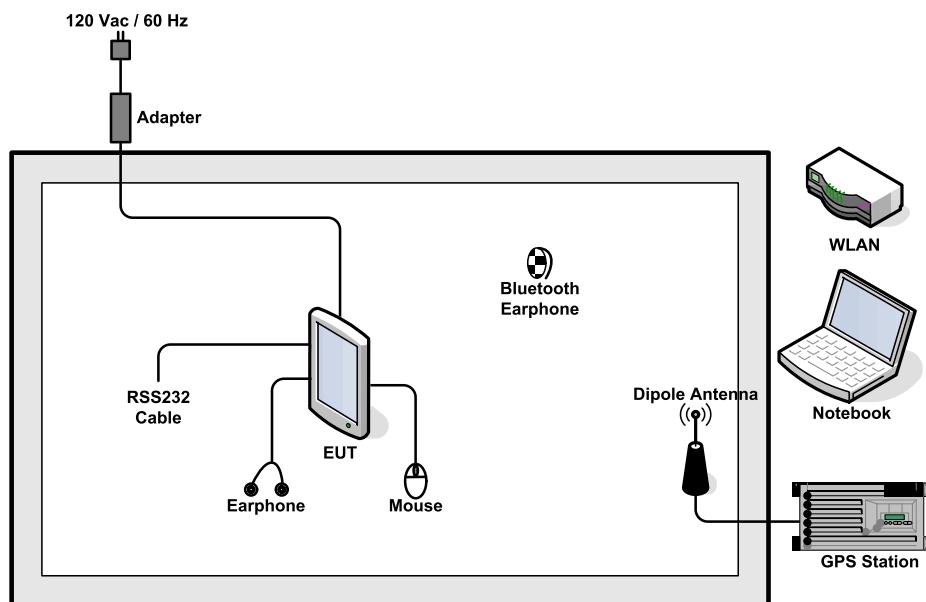

**Remark:** TC stands for Test Configuration, and consists of iPod earphone, USB Mouse, and MPEG4.

## 2.2 Connection Diagram of Test System

< Radiated Emissions Mode >

<AC Conducted Emission Mode>

## 2.3 RF Utility

The programmed RF utility “SRU”, is installed in EUT to provide channel selection, power level, data rate and the application type. RF Utility can send transmitting signal for all testing.

### 3 Test Result

#### 3.1 Band Edges Measurement

##### 3.1.1 Limit of Band Edges

In any 100 kHz bandwidth outside the intentional radiation frequency band, the radio frequency power shall be at least 20 dB below the highest level of the radiated power. If the output power of this device was measured by spectrum analyzer, the attenuation under this paragraph shall be 30 dB instead of 20 dB.

##### 3.1.2 Measuring Instruments

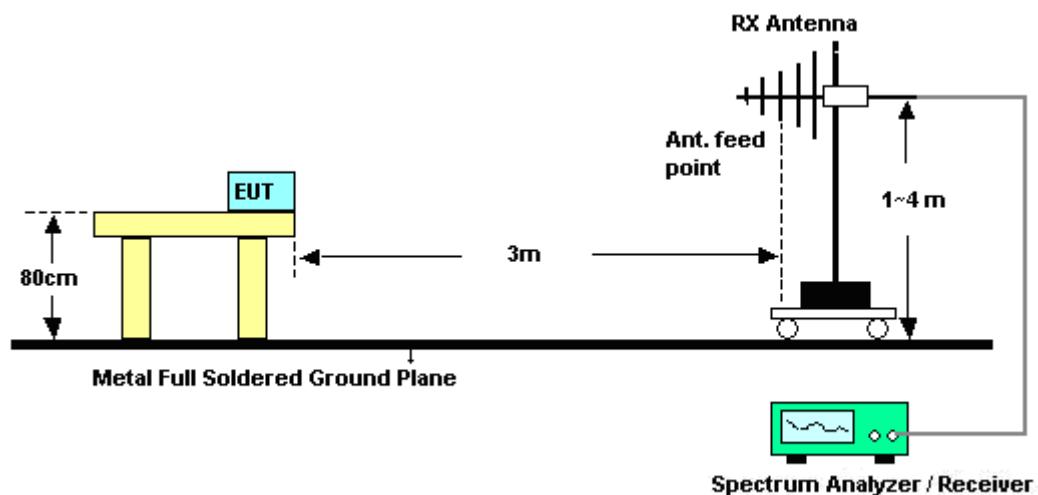

See list of measuring instruments of this test report.

##### 3.1.3 Test Procedures

1. The testing follows the guidelines in ANSI C63.4-2003 and FCC KDB Publication No. 558074 (Measurement Guidelines of DTS).
2. Conducted emission test: Set RBW = 100 kHz, Video bandwidth (VBW) > RBW. Band edge emissions must be at least 20 dB below the highest emission level within the authorized band as measured with a 100 kHz RBW. Note: If the output power of this device was measured by power meter, the attenuation under this paragraph shall be 30 dB instead of 20 dB.
3. Radiated emission test: Apply to band edge emissions that fall in the restricted bands listed in FCC Section 15.205. The maximum permitted average field strength is listed in FCC Section 15.209. A pre-amp is necessary for this measurement. For measurements above 1 GHz, set RBW = 1MHz, VBW = 10 Hz, Sweep=Auto. If the emission is pulsed, modify the unit for continuous operation; use the settings shown above, then correct the reading by subtracting the peak-average correction factor, derived from the appropriate duty cycle calculation as in FCC Section 15.35(b) and (c).

### 3.1.4 Test Setup

### 3.1.5 Test Result of Radiated Band Edges

## 3.2 AC Conducted Emission Measurement

### 3.2.1 Limit of AC Conducted Emission

For equipment that is designed to be connected to the public utility (AC) power line, the radio frequency voltage that is conducted back onto the AC power line on any frequency or frequencies within the band 150 kHz to 30 MHz shall not exceed the limits in the following table.

| Frequency of Emission<br>(MHz) | Conducted Limit (dBuV) |           |
|--------------------------------|------------------------|-----------|
|                                | Quasi-Peak             | Average   |
| 0.15-0.5                       | 66 to 56*              | 56 to 46* |
| 0.5-5                          | 56                     | 46        |
| 5-30                           | 60                     | 50        |

\*Decreases with the logarithm of the frequency.

### 3.2.2 Measuring Instruments

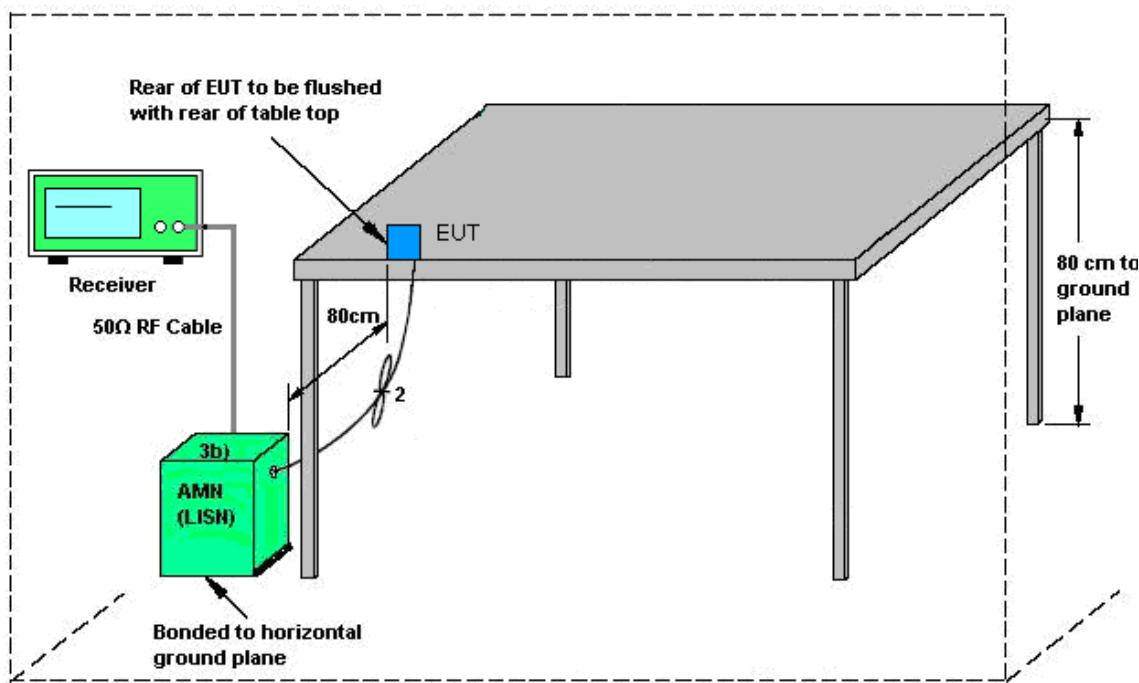

See list of measuring instruments of this test report.

### 3.2.3 Test Procedures

1. The testing follows the guidelines in ANSI C63.4-2003.
2. The EUT was placed 0.4 meter from the conducting wall of the shielding room, and it was kept at least 80 centimeters from any other grounded conducting surface.
3. Connect EUT to the power mains through a line impedance stabilization network (LISN).
4. All the support units are connecting to the other LISN.
5. The LISN provides 50 ohm coupling impedance for the measuring instrument.
6. The FCC states that a 50 ohm, 50 microhenry LISN should be used.
7. Both sides of AC line were checked for maximum conducted interference.
8. The frequency range from 150 kHz to 30 MHz was searched.
9. Set the test-receiver system to Peak Detect Function and specified bandwidth with Maximum Hold Mode.

### 3.2.4 Test Setup

AMN = Artificial mains network (LISH)

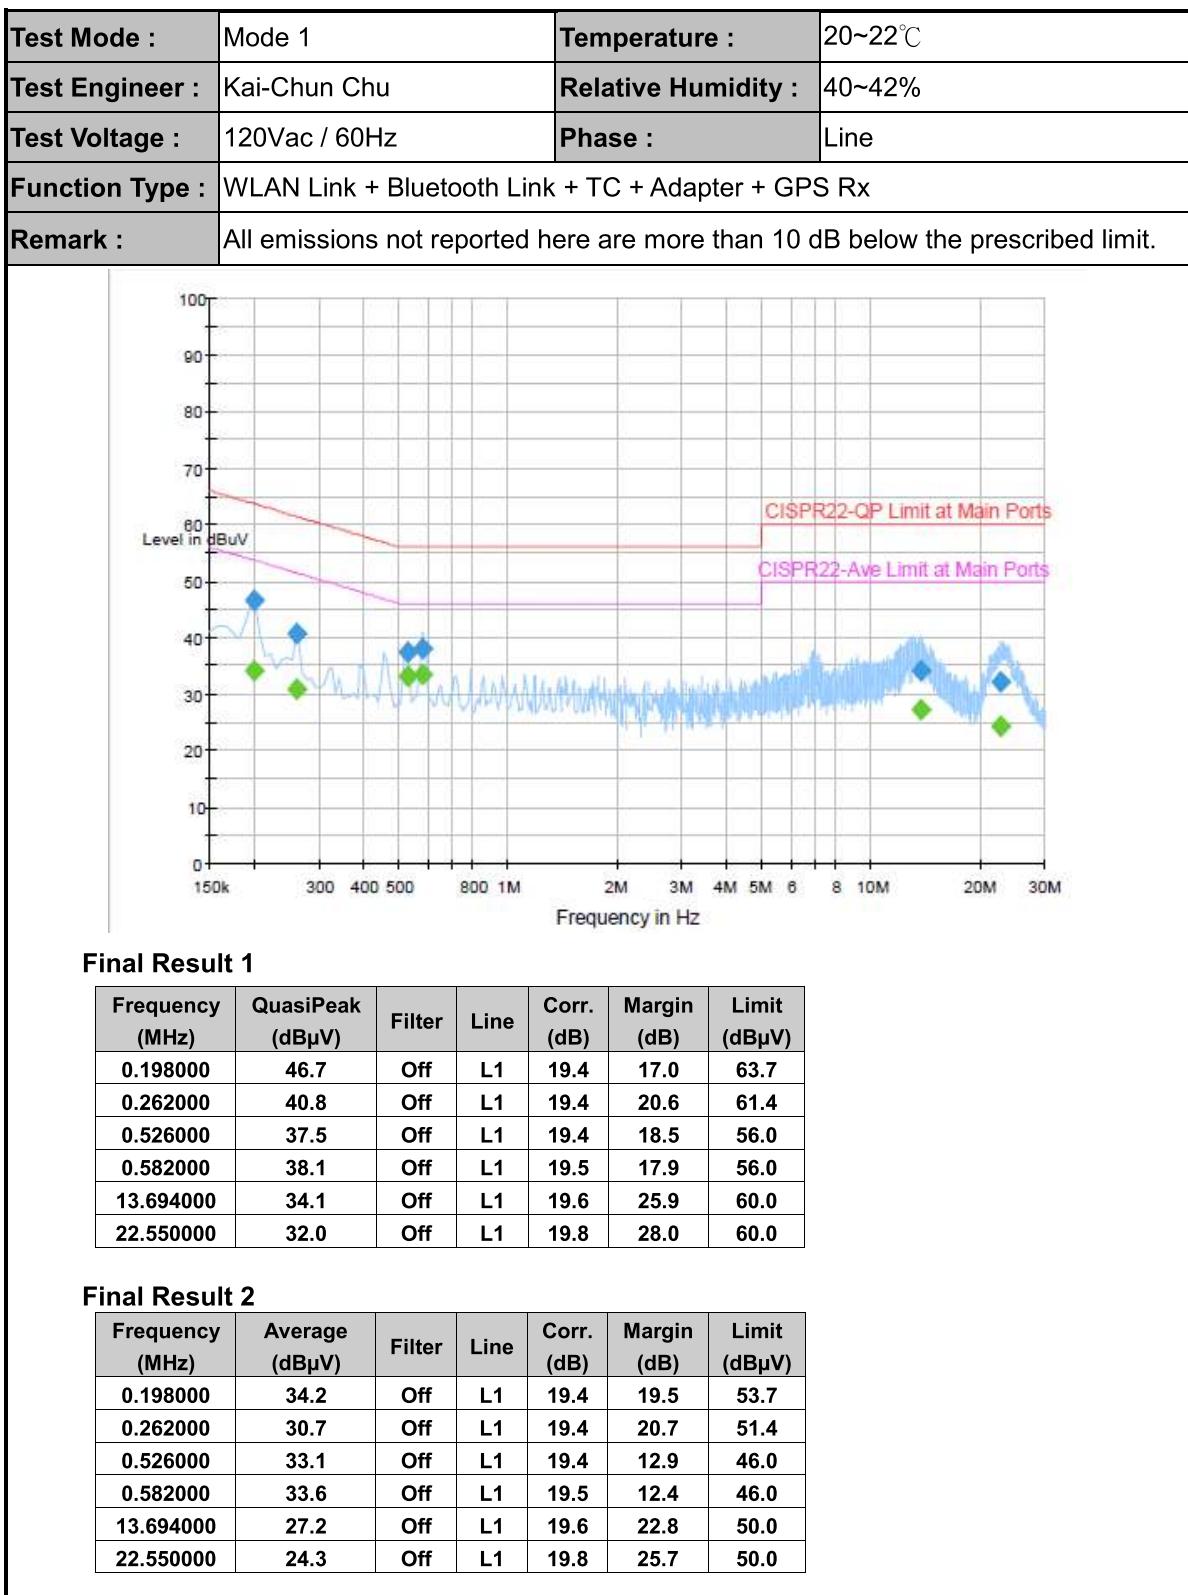

AE = Associated equipment

EUT = Equipment under test

ISN = Impedance stabilization network

### 3.2.5 Test Result of AC Conducted Emission

**Final Result 1**

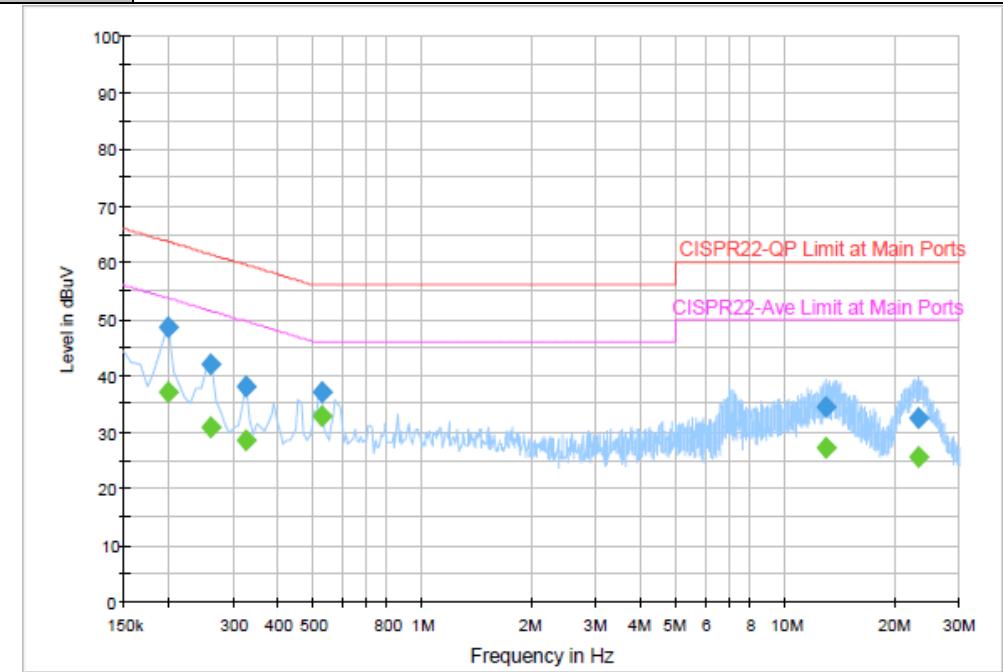

| Frequency (MHz) | QuasiPeak (dB $\mu$ V) | Filter | Line | Corr. (dB) | Margin (dB) | Limit (dB $\mu$ V) |
|-----------------|------------------------|--------|------|------------|-------------|--------------------|
| 0.198000        | 46.7                   | Off    | L1   | 19.4       | 17.0        | 63.7               |

### 3.3 Radiated Emission Measurement

#### 3.3.1 Limit of Radiated Emission

In any 100 kHz bandwidth outside the intentional radiator frequency band, all harmonics/spurious must be at least 20 dB below the highest emission level within the authorized band. If the output power of this device was measured by spectrum analyzer, the attenuation under this paragraph shall be 30 dB instead of 20 dB. In addition, radiated emissions which fall in the restricted bands must also comply with the FCC section 15.209 limits as below.

| Frequency<br>(MHz) | Field Strength<br>(microvolts/meter) | Measurement Distance<br>(meters) |
|--------------------|--------------------------------------|----------------------------------|
| 0.009 – 0.490      | 2400/F(kHz)                          | 300                              |
| 0.490 – 1.705      | 24000/F(kHz)                         | 30                               |
| 1.705 – 30.0       | 30                                   | 30                               |
| 30 – 88            | 100                                  | 3                                |
| 88 – 216           | 150                                  | 3                                |
| 216 - 960          | 200                                  | 3                                |
| Above 960          | 500                                  | 3                                |

#### 3.3.2 Measuring Instruments

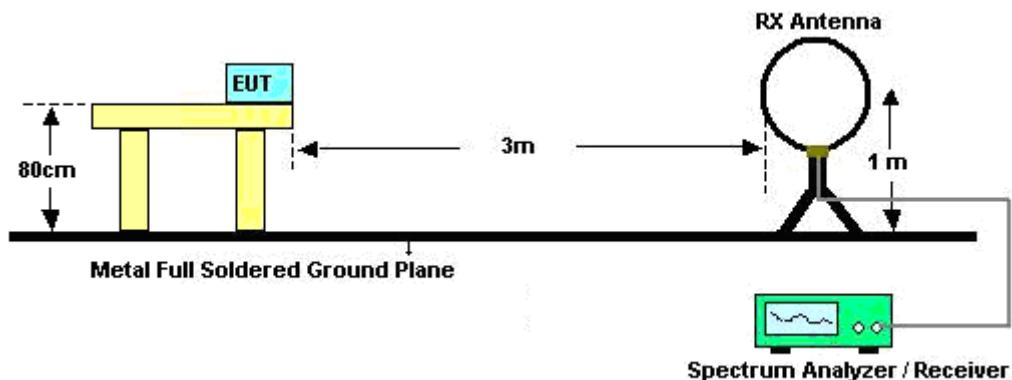

See list of measuring instruments of this test report.

#### 3.3.3 Test Procedures

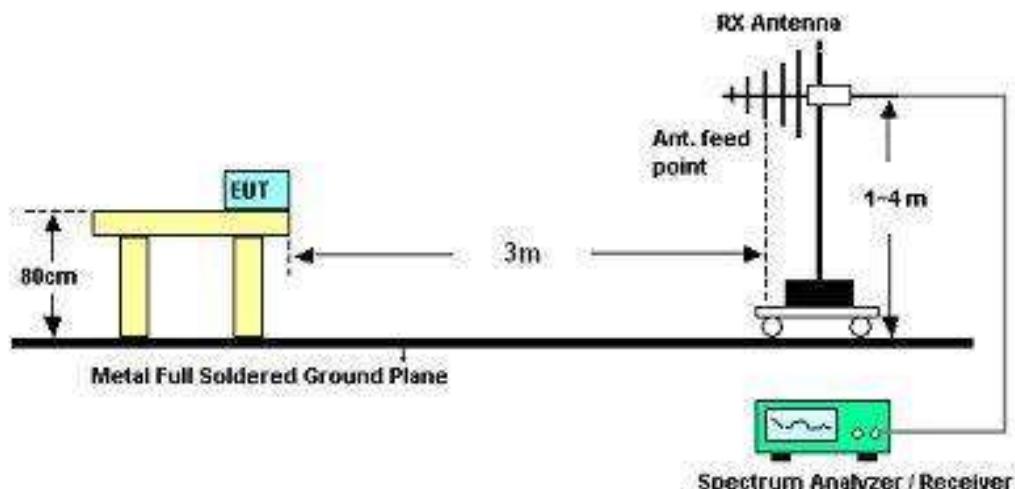

1. The testing follows the guidelines in FCC KDB Publication No. 558074 (Measurement Guidelines of DTS).
2. Use the following spectrum analyzer settings:
  - (1) Span = wide enough to fully capture the emission being measured; RBW = 1 MHz for  $f \geq 1$  GHz, 100 kHz for  $f < 1$  GHz; VBW  $\geq$  RBW; Sweep = auto; Detector function = peak; Trace = max hold.
  - (2) Above 18 GHz shall be extrapolated to the specified distance using an extrapolation factor of 20 dB/decade from 3m to 1m.  
Distance extrapolation factor =  $20 \log (\text{specific distance [3m]} / \text{test distance [1m]})$  (dB)
3. Follow the guidelines in ANSI C63.4-2003 with respect to maximizing the emission by rotating the EUT, measuring the emission for three EUT orthogonal planes, and adjusting the measurement antenna height and polarization. A pre-amp and a high pass filter are used for this test in order to get the good signal level.

### 3.3.4 Test Setup

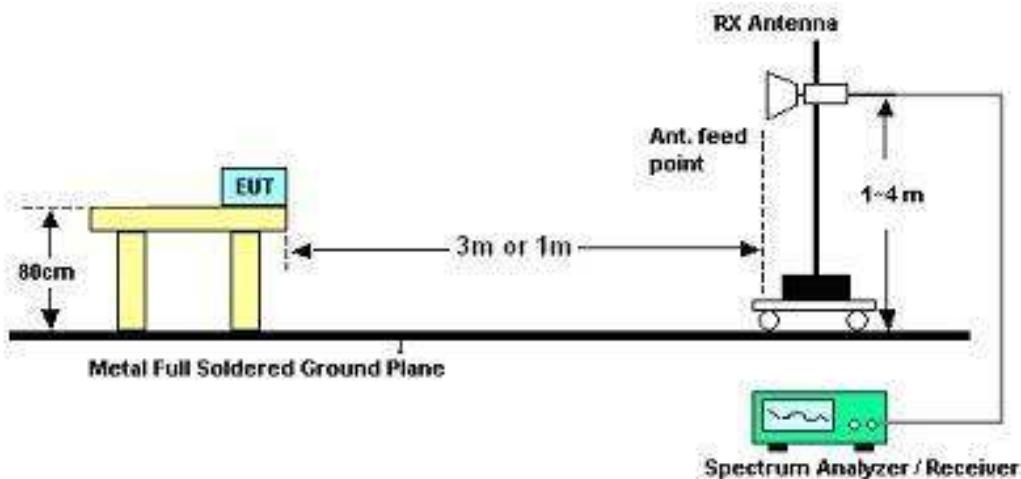

For radiated emissions below 30MHz

For radiated emissions from 30MHz to 1GHz

## For radiated emissions above 1GHz

## 3.3.5 Test Results of Radiated Emissions (9kHz ~ 30MHz)

| Test Engineer : | Wii Chang    | Temperature :       | 23~26°C           |          |
|-----------------|--------------|---------------------|-------------------|----------|
|                 |              | Relative Humidity : |                   |          |
| Frequency (MHz) | Level (dBuV) | Over Limit (dB)     | Limit Line (dBuV) | Remark   |
| -               | -            | -                   | -                 | See Note |

## Note:

The amplitude of spurious emissions that are attenuated by more than 20dB below the permissible value has no need to be reported.

Distance extrapolation factor =  $40 \log (\text{specific distance} / \text{test distance})$  (dB);

Limit line = specific limits (dBuV) + distance extrapolation factor.

## 5 Uncertainty of Evaluation

### Uncertainty of Conducted Emission Measurement (150kHz ~ 30MHz)

| Contribution   | Uncertainty of $X_i$ |                          | $u(X_i)$ |
|--|----------------------|--------------------------|----------|
|  | dB                   | Probability Distribution |          |
| Receiver Reading   | 0.10                 | Normal (k=2)             | 0.05     |
| Cable Loss   | 0.10                 | Normal (k=2)             | 0.05     |
| AMN Insertion Loss   | 2.50                 | Rectangular              | 0.63     |
| Receiver Specification   | 1.50                 | Rectangular              | 0.43     |
| Site Imperfection  | 1.39                 | Rectangular              | 0.80     |
| Mismatch   | +0.34 / -0.35        | U-Shape                  | 0.24     |
| <b>Combined Standard Uncertainty <math>U_c(y)</math></b>                                 | <b>1.13</b>          |                          |          |
| <b>Measuring Uncertainty for a Level of Confidence of 95% (<math>U = 2U_c(y)</math>)</b> | <b>2.26</b>          |                          |          |

### Uncertainty of Radiated Emission Measurement (30MHz ~ 1000MHz)

| Contribution   | Uncertainty of $X_i$ |                          | $u(X_i)$ |
|--|----------------------|--------------------------|----------|
|  | dB                   | Probability Distribution |          |
| Receiver Reading   | 0.41                 | Normal (k=2)             | 0.21     |
| Antenna Factor Calibration   | 0.83                 | Normal (k=2)             | 0.42     |
| Cable Loss Calibration   | 0.25                 | Normal (k=2)             | 0.13     |
| Pre-Amplifier Gain Calibration   | 0.27                 | Normal (k=2)             | 0.14     |
| RCV/SPA Specification  | 2.50                 | Rectangular              | 0.72     |
| Antenna Factor Interpolation for Frequency   | 1.00                 | Rectangular              | 0.29     |
| Site Imperfection  | 1.43                 | Rectangular              | 0.83     |
| Mismatch   | +0.39 / -0.41        | U-Shape                  | 0.28     |
| <b>Combined Standard Uncertainty <math>U_c(y)</math></b>                                 | <b>1.27</b>          |                          |          |
| <b>Measuring Uncertainty for a Level of Confidence of 95% (<math>U = 2U_c(y)</math>)</b> | <b>2.54</b>          |                          |          |

Uncertainty of Radiated Emission Measurement (1GHz ~ 40GHz)

| Contribution  | Uncertainty of X <sub>i</sub> |                          | u(X <sub>i</sub> ) | C <sub>i</sub> | C <sub>i</sub> * u(X <sub>i</sub> ) |
|---|-------------------------------|--------------------------|--------------------|----------------|-------------------------------------|
|   | dB                            | Probability Distribution |                    |                |                                     |
| Receiver Reading  | ±0.10                         | Normal (k=2)             | 0.10               | 1              | 0.10                                |

### List of Accessory:

| Specification of Accessory |            |                            |
|----------------------------|------------|----------------------------|
| AC Adapter                 | Brand Name | CINCON ELECTRONICS         |
|                            | Model Name | TRG36A15 12E03             |
| Battery 1                  | Brand Name | DAP                        |
|                            | Model Name | VE026-8034                 |
| Battery 2                  | Brand Name | DAP                        |
|                            | Model Name | VE026-8035                 |
| LCD Panel                  | Brand Name | SGD                        |
|                            | Model Name | GNTW70NNBA1E0              |
| Camera 1                   | Brand Name | DEMARREN                   |
|                            | Model Name | Q5M03A                     |
| WWAN Module                | Brand Name | Sierra Wireless            |
|                            | Model Name | MC8355                     |
| WLAN Module                | Brand Name | Summit Data Communications |
|                            | Model Name | SDC-PE15N                  |
| Bluetooth Module           | Brand Name | Bluegiga                   |
|                            | Model Name | WT21-A                     |
| Power Cord 1               | Brand Name | QUAIL                      |
|                            | Model Name | 1062.079(NAM032)           |
| Power Cord 2               | Brand Name | QUAIL                      |
|                            | Model Name | 8002.079(NAM033)           |
| Power Cord 3               | Brand Name | QUAIL                      |
|                            | Model Name | 9657.079(NAM034)           |

**Remark:** For accessories equipped with this EUT, please refer to the following photos.

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

Battery 1

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

### 3. Internal Photograph of EUT

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

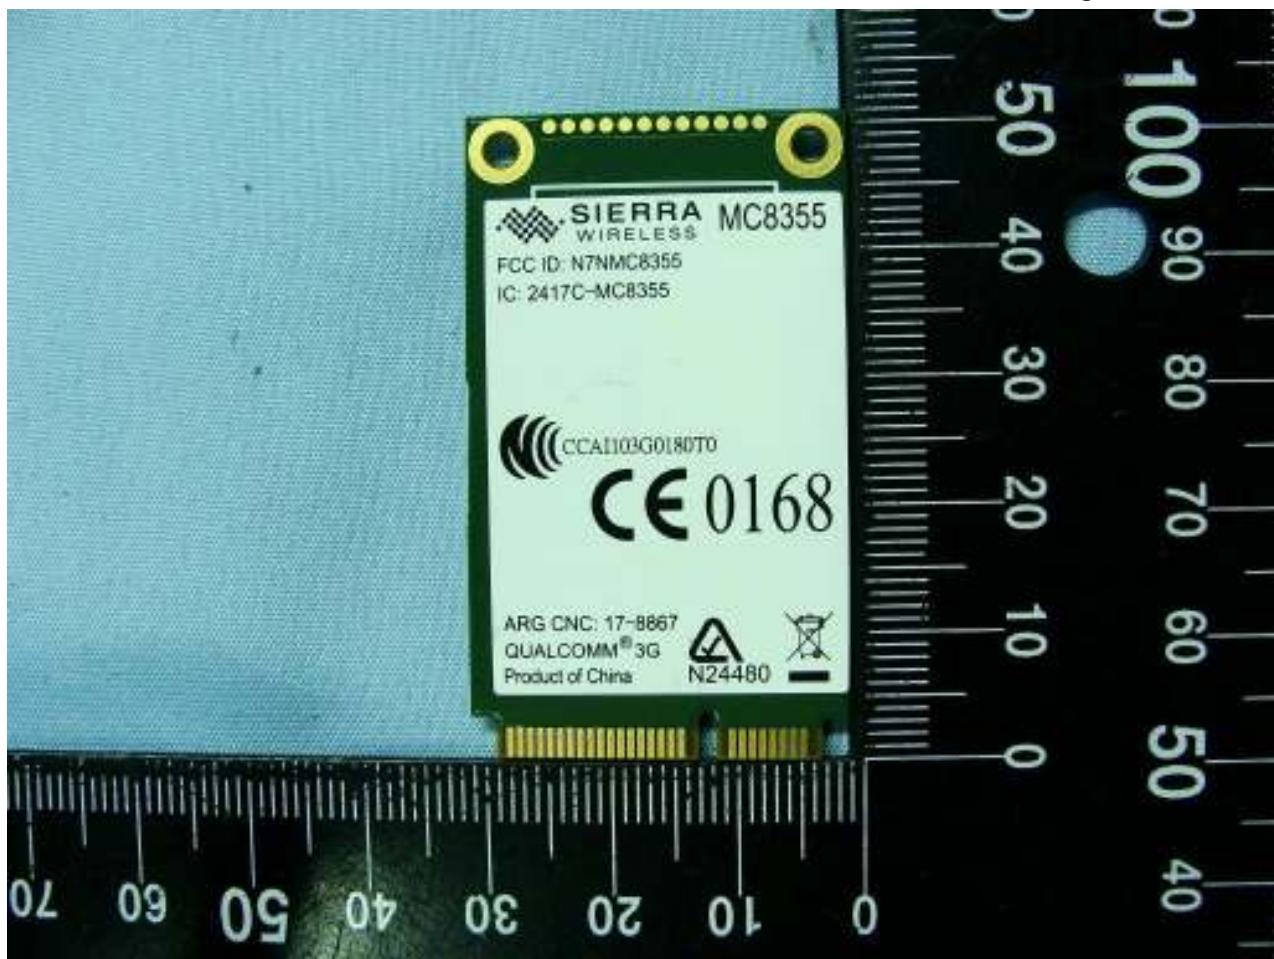

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

**WWAN and GPS Module**

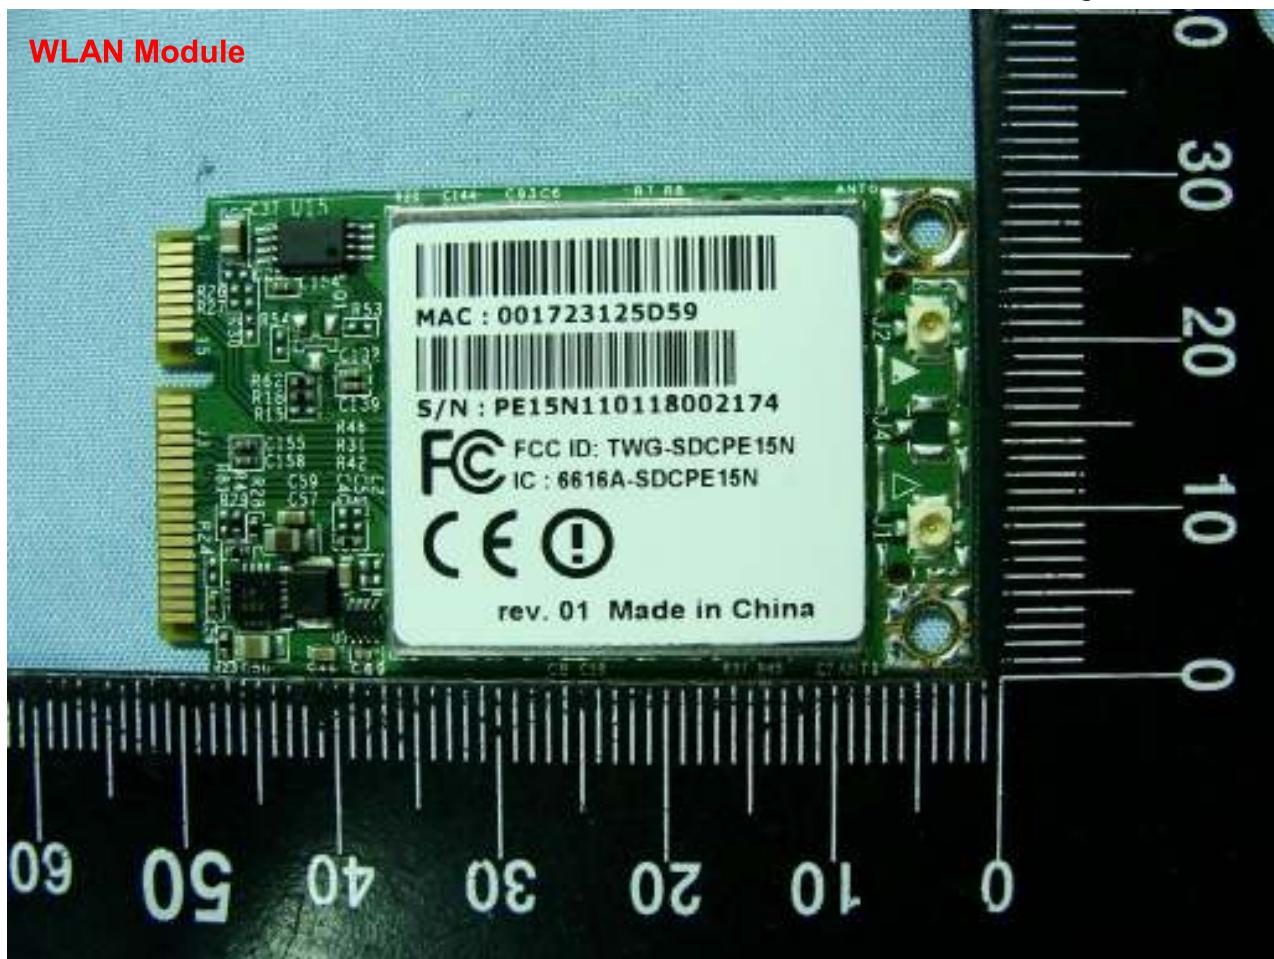

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

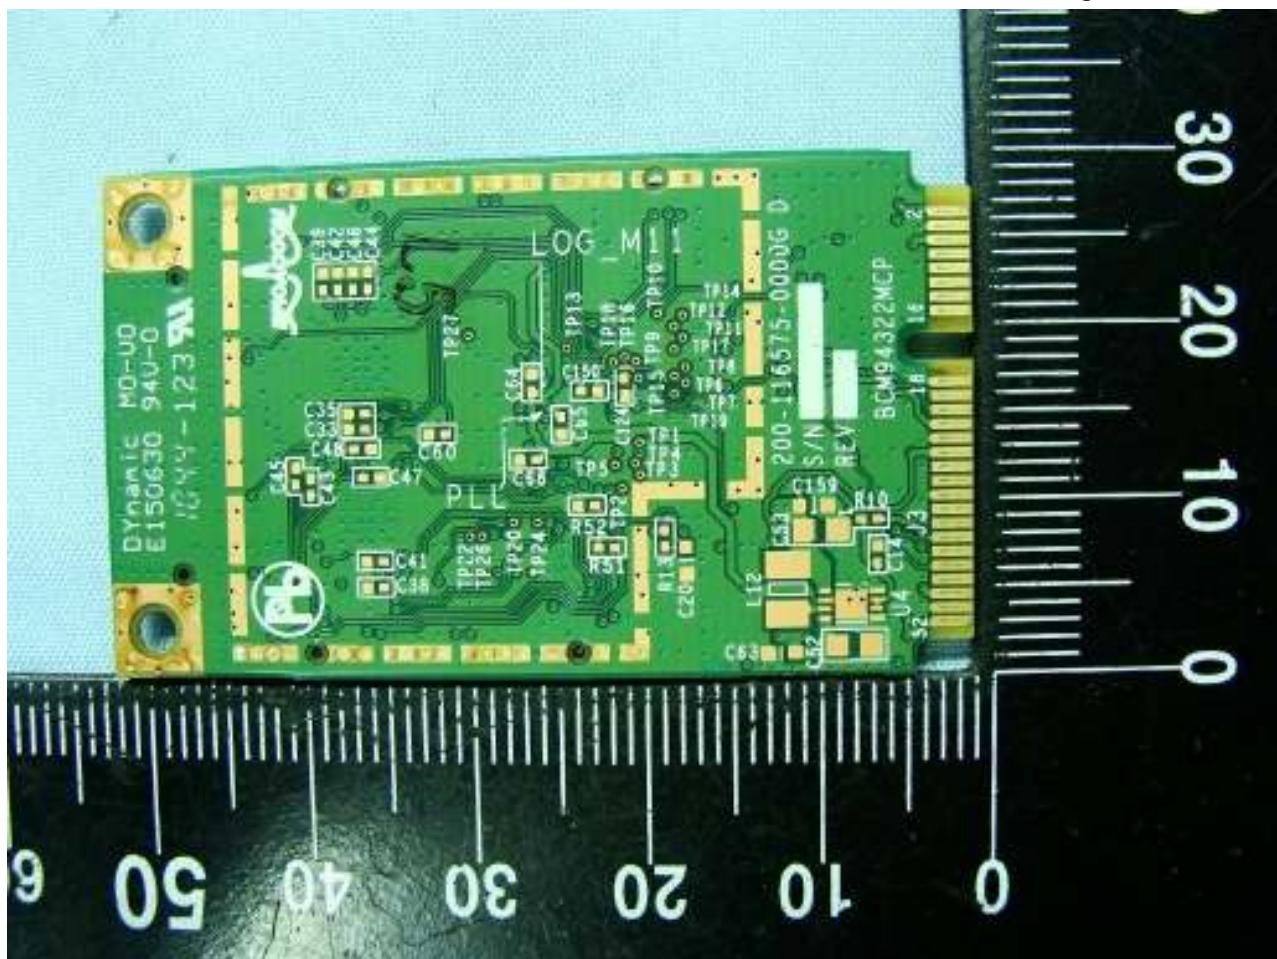

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

**WLAN Module**

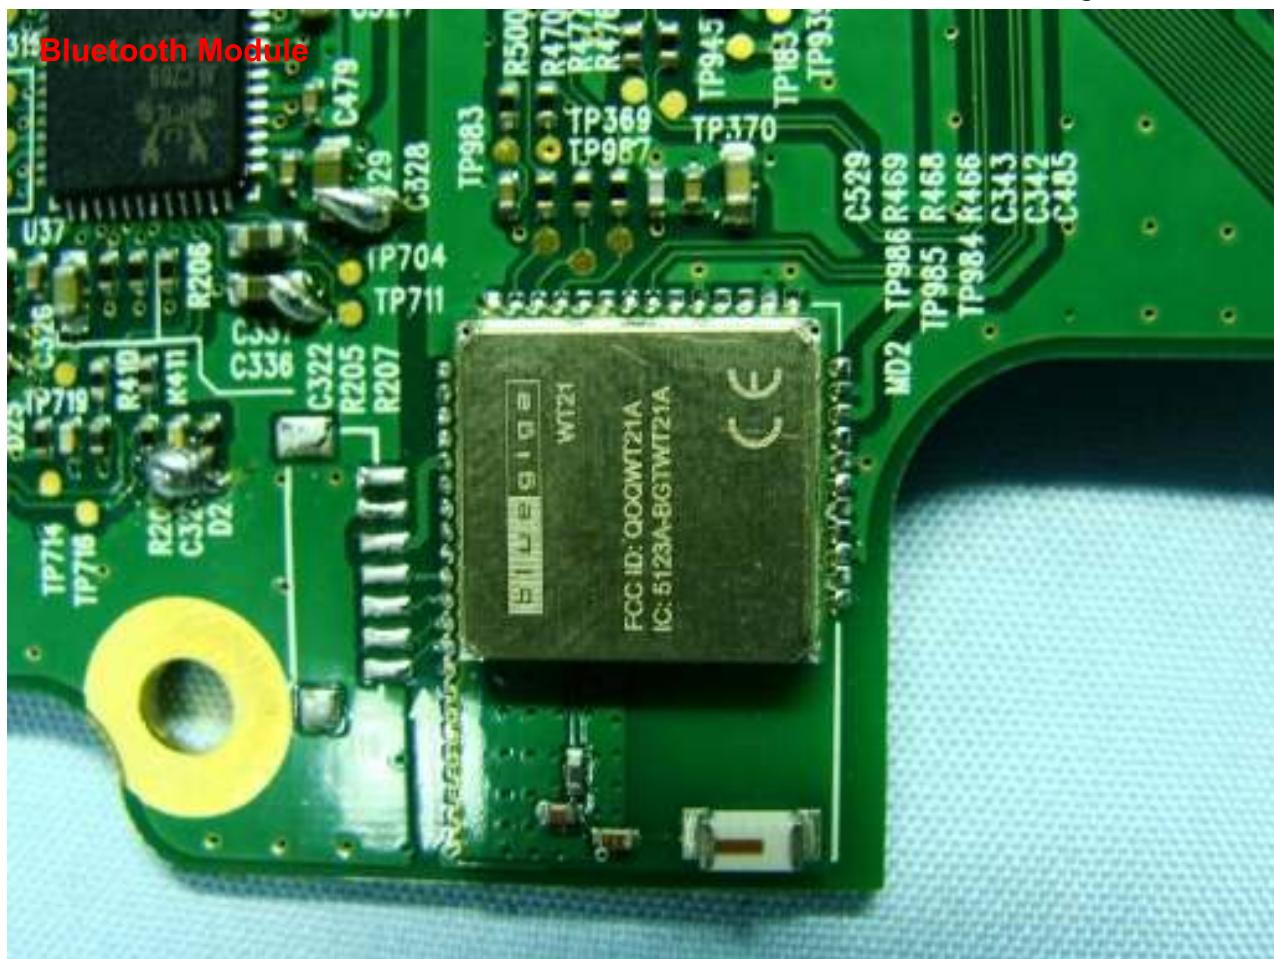

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

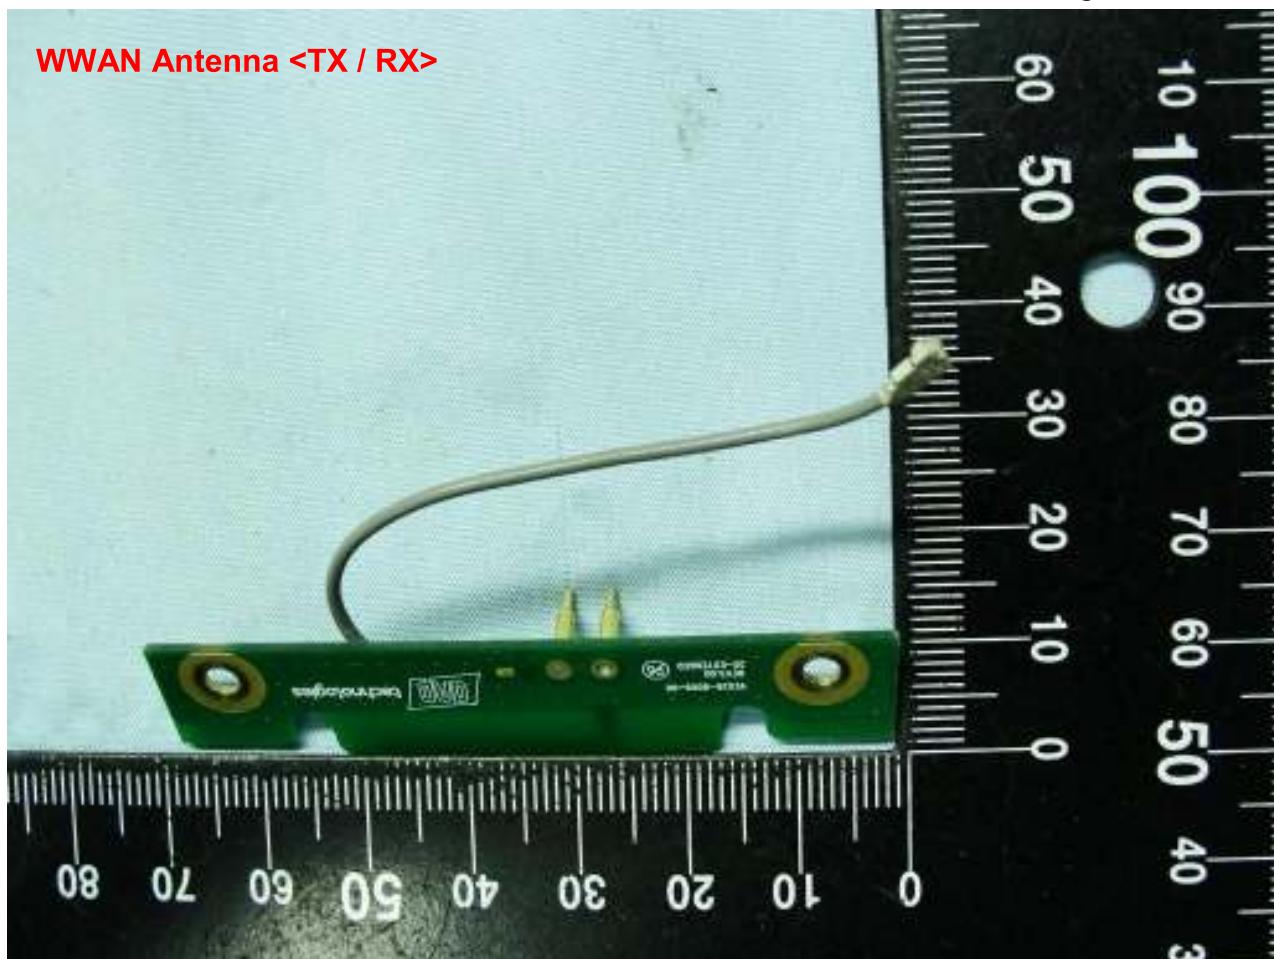

**Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010**

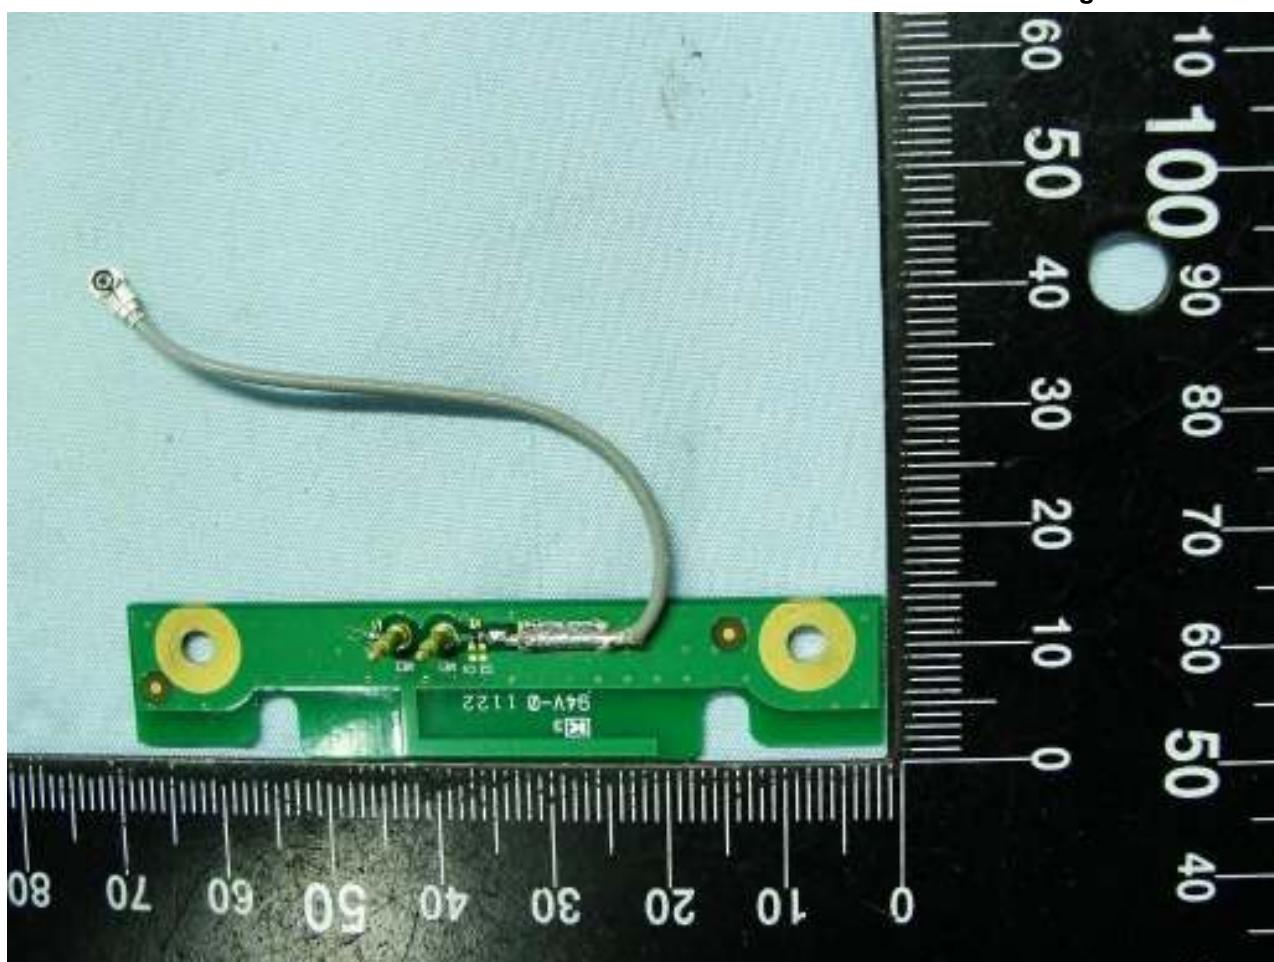

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

WWAN Antenna <TX / RX>

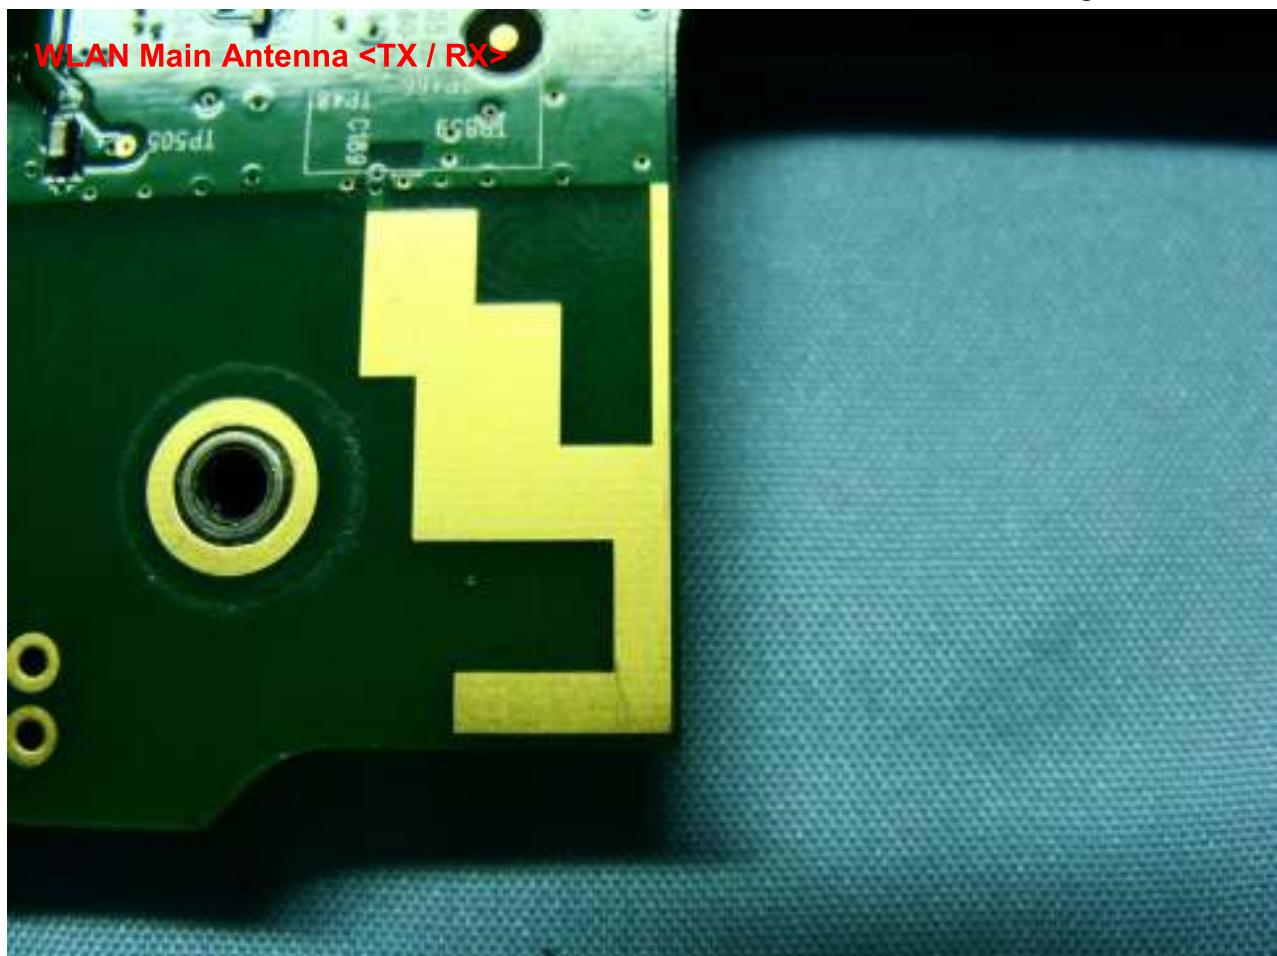

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

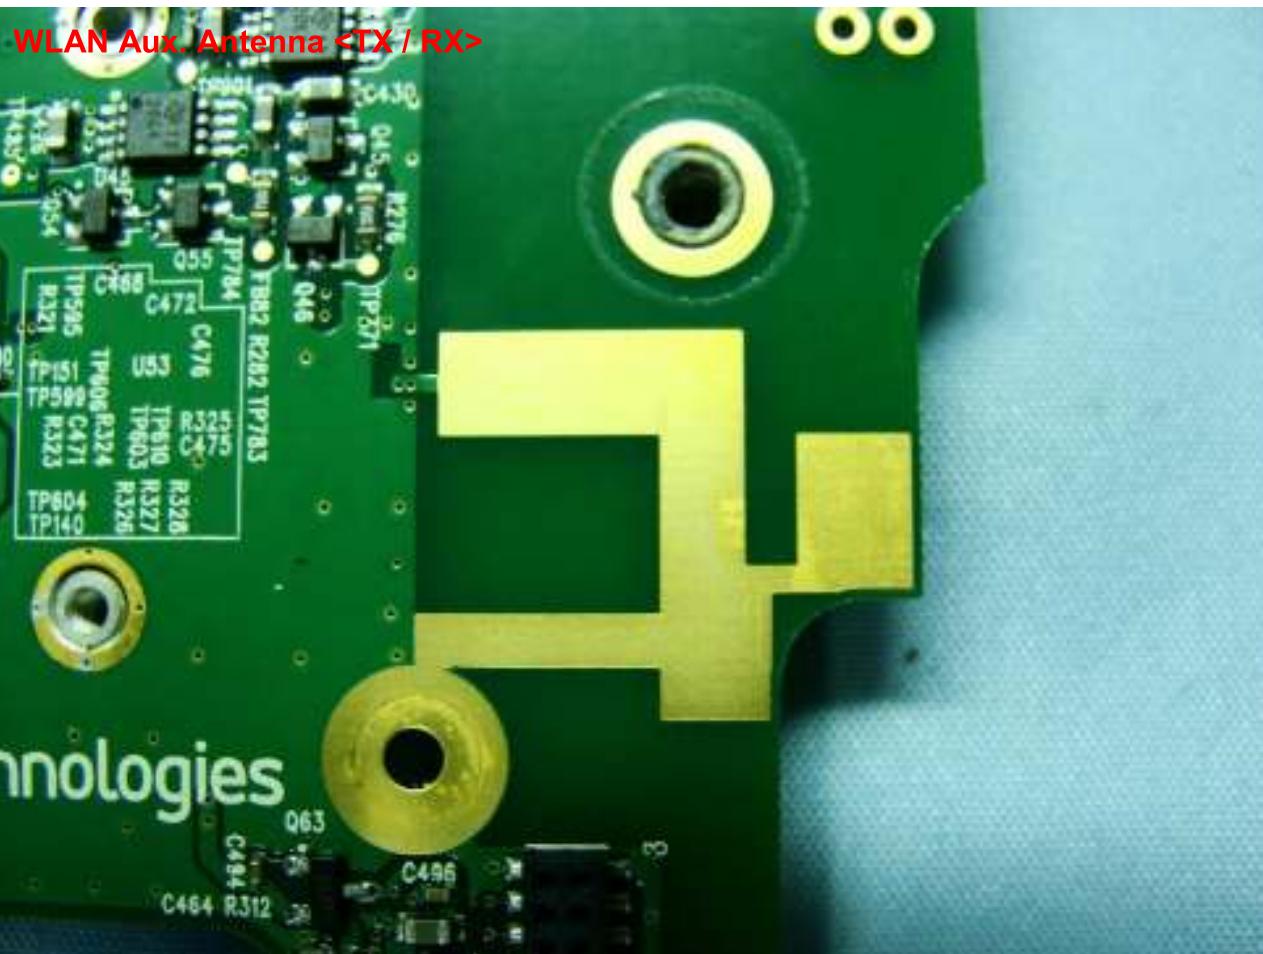

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

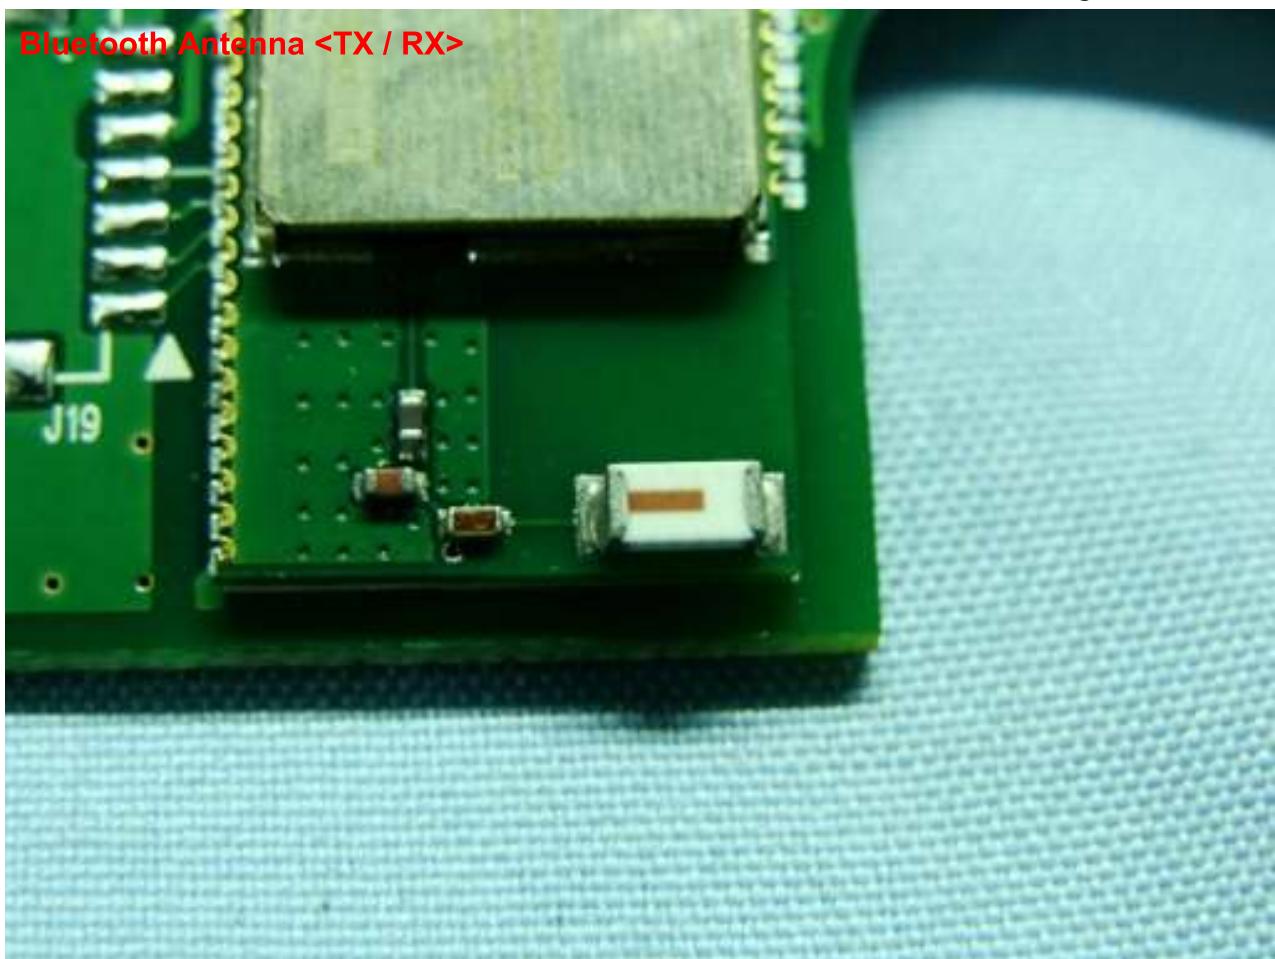

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

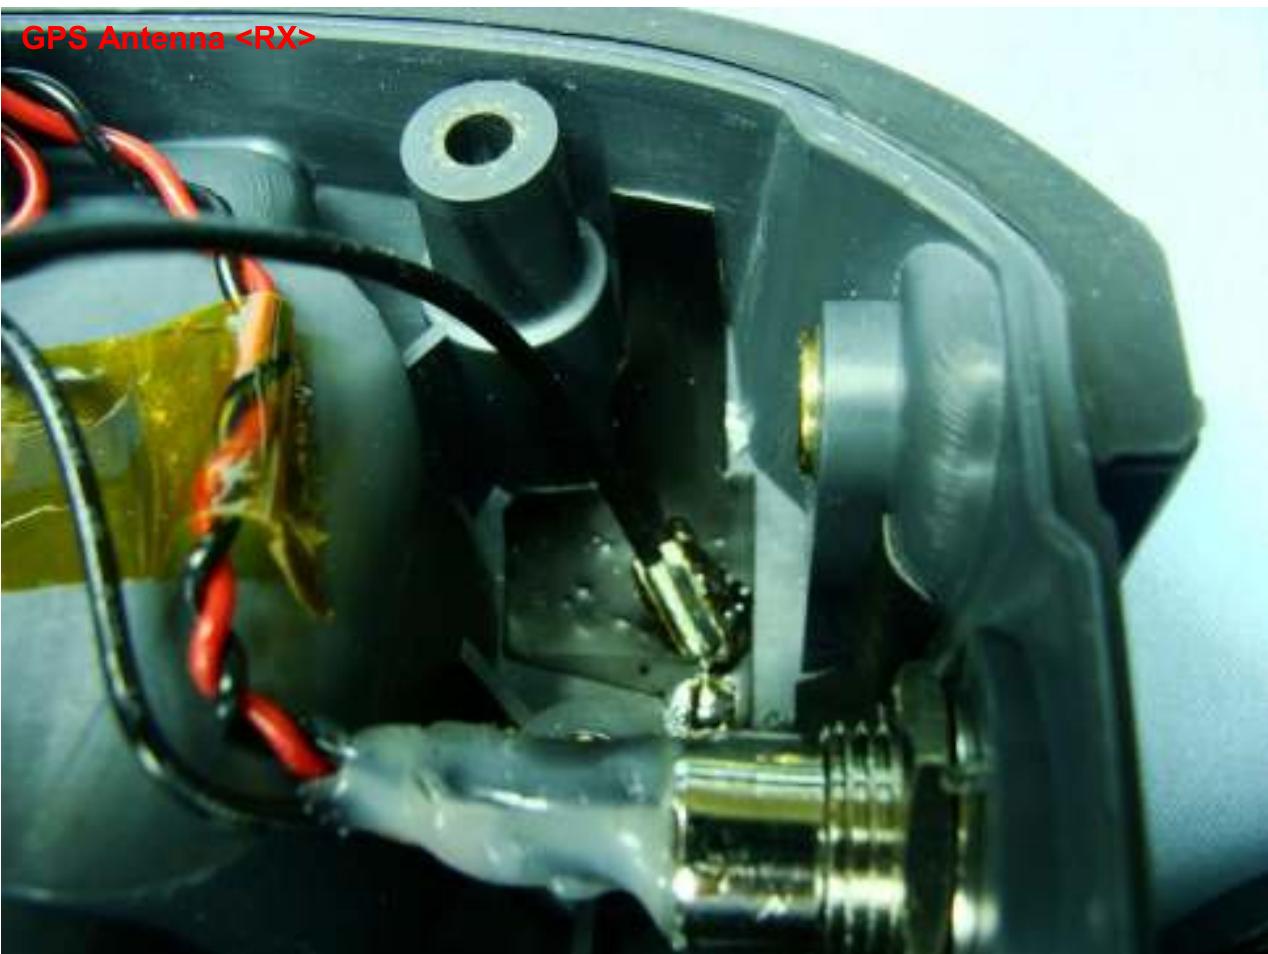

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010

Bluetooth Antenna <TX / RX>

Brand Name: DAP / Model Name: 9000WBWV1 / Marketing Name: M9010
