

FLUKE®

Date: October 28, 2015

American Certification Body, Inc.
6731 Whittier Avenue
Suite C110
McLean, VA 22101

To Whom It May Concern:

Regarding the USB1 FC Wi-Fi BLE adapter. Fluke is aware that classic Bluetooth is not an allowable mode of operation in all products that host the adapter.

The classic Bluetooth mode (BR and EDR) will not be available in all Fluke test instrument host products that use the adapter. The host firmware that resides inside a Fluke test instrument limits the Bluetooth mode of operation to Bluetooth low energy only, the adapter will not operate or transmit without the firmware in the host, so Bluetooth low energy is the only mode of Bluetooth operation..

Thank you,
