

The Product Realization Company

ATTESTATION

23 Apr 2014

TUV SUD BABT FCB
Octagon House,
Segensworth Road,
Fareham,
Hampshire,
PO15 5RL

To whom it may concern,

Panasonic's PAN1326 and PAN1326B are identical except the "B" module will be based on Texas Instruments' new CC2564B controller allowing the module to support assisted mode for HFP1.6 (WBS) profile or the A2DP profile. The PAN1326B also supports 10 LE connections instead of 6. The patient Reader 25000 is using the Pan1326B as Panasonic is recommending all new designs use this instead of PAN1326.

Sincerely,

Name: Jim Sponsler

Title: Sr. Quality Engineer
