

# PAN1762

Bluetooth Low Energy Module

## Product Specification

Rev. 1.1

## Overview

The PAN1762 is a Panasonic Bluetooth® 5.0 Low Energy (LE) module based on the Toshiba TC35680 single-chip controller.

## Features

- Small SMD module: 15.6 mm x 8.7 mm x 1.9 mm
- Same form factor and pinout as PAN1026A and PAN1760A
- Bluetooth LE 5.0 compliant
- Bluetooth stack in ROM
- 128 kB flash memory available for application
- Max. 51 kB RAM for application code and ROM patches
- Host mode and stand-alone mode operation, AT command mode (soon)
- Standard SIG Bluetooth LE profiles as well as SPP over Bluetooth LE profile
- 18 General Purpose I/Os, which are shared by 2 SPI, 2 I<sup>2</sup>C, 2 UART, 4 PWM, 5 ADC, and Wake-Up inputs
- Toshiba TC35680 featuring ARM® Cortex®-M0 with SWD interface

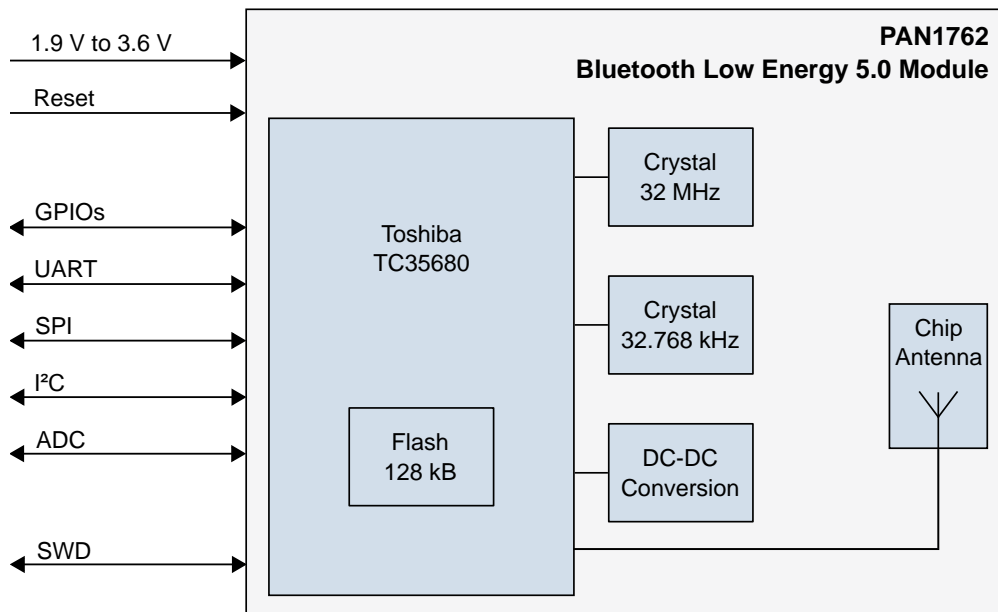

## Bluetooth

- 2 Mbps high-speed PHY, LE long range coded PHY
- LE advertising extensions (advertising on 40 channels)
- Channel selection algorithm #2
- LE secure connections
- Advertising function without CPU Wake-Up and interaction
- Bluetooth SIG certified Mesh stack (soon)

## Characteristics

- Typical sensitivity -95 dBm @ 1 Mb/s and -105 dBm @ 125 kb/s
- Output power max. 8 dBm
- Typical current consumption of 11 mA in TX (@ 8 dBm) and 5.1 mA in RX mode
- Voltage range: 1.9 V to 3.6 V
- Temperature range: -40 °C to 85 °C

## Block Diagram

By purchase of any of the products described in this document the customer accepts the document's validity and declares their agreement and understanding of its contents and recommendations. Panasonic reserves the right to make changes as required at any time without notification. Please consult the most recently issued Product Specification before initiating or completing a design.

This Product Specification does not lodge the claim to be complete and free of mistakes.

### **Engineering Samples (ES)**

If Engineering Samples are delivered to the customer, these samples have the status "Engineering Samples". This means that the design of this product is not yet concluded. Engineering Samples may be partially or fully functional, and they may differ from the published Product Specification.

Engineering Samples are not qualified and they are not to be used for reliability testing or series production.

### **Disclaimer**

The customer acknowledges that samples may deviate from the Product Specification and may bear defects due to their status of development and the lack of qualification mentioned above.

Panasonic rejects any liability or product warranty for Engineering Samples. In particular, Panasonic disclaims liability for damages caused by:

- The use of the Engineering Sample other than for evaluation purposes, particularly the installation or integration in another product to be sold by the customer,
- Deviation or lapse in function of the Engineering Sample,
- Improper use of the Engineering Sample.

Panasonic Industrial Devices Europe GmbH disclaims any liability for consequential and incidental damages. In case of any queries regarding the Engineering Samples, please contact your local sales partner or the related product manager.

# 1 About This Document

## 1.1 Purpose and Audience

This Product Specification provides details on the functional, operational, and electrical characteristics of the Panasonic module PAN1762.

It is intended for hardware design, application, and Original Equipment Manufacturers (OEM) engineers.

The product is referred to as “the PAN1762” or “the module” within this document.

## 1.2 Revision History

| Revision | Date       | Modifications/Remarks                              |
|----------|------------|--|
| 1.0      | 2018-11-20 | Initial release                                    |
| 1.1      | 2019-05-28 | Added certification and qualification information. |

## 1.3 Use of Symbols

| Symbol  | Description  |

## 2 Overview

The PAN1762 is a Panasonic Bluetooth 5.0 Low Energy module based on the Toshiba TC35680 single-chip controller.

The new Bluetooth 5.0 features enable a higher symbol rate of 2 Mbps using the high-speed 2 M PHY or a significantly longer range using the Low Energy coded PHY at 500 kb/s or 125 kb/s. The new channel selection algorithm improves the performance in environments which are busy at 2.4 GHz. Furthermore, the new LE advertising extensions allow for much larger amounts of data to be broadcast in connectionless scenarios and are therefore favorable for beacon and mesh applications.

A high output power of up to 8 dBm and the industry leading sensitivity of the TC35680 in combination with the Low Energy coded PHY make the module very attractive in applications where a long range is required.

The ultra-low current consumption of the PAN1762 makes the module an ideal choice for battery powered devices. Various sleep modes can be used to minimize power consumption and prolong battery life time.

To provide maximum flexibility, the module can be operated in hosted as well as standalone mode.

In standalone mode no external processor is necessary, which saves complexity, space, and cost. The built-in 128 kB flash memory is completely free for application use.

PAN1762 shares the same small form factor and footprint as PAN1026A and PAN1760A. When migrating from PAN1760A or PAN1760 only minor code changes are required. Previously developed software, such as Bluetooth Low Energy profiles and applications, can be easily migrated with a minimal effort.

FCC, IC, MIC, and CE approval are available.

| D8  | GND            | Ground Pin  | Connect to ground                                       |
| D9  | ANT            | RF-Signal   | Antenna pin (not connected for standard module version) |
| E1  | GPIO12/SDA     | Digital I/O | I2C interface   |
| E2  | GPIO11/SCL     | Digital I/O | I2C interface   |
| E3  | NC             | NC          | Not connected, leave open                               |

| No  | Pin Name     | Pin Type       | Description   |
|-----|--------------|----------------|---|
| E4  | NC           | NC             | Not connected, leave open                               |
| E5  | NC           | SLPXOIN        | Not connected for standard version (32 kHz clock input) |
| E6  | GPIO6/UARTRX | Digital Input  | UART RX   |
| E7  | NC           | NC             | Not connected, leave open                               |
| E8  | GND          | Ground Pin     | Connect to ground                                       |
| E9  | GND          | Ground Pin     | Connect to ground                                       |
| F1  | GND          | Ground Pin     | Connect to ground                                       |
| F2  | NC           | NC             | Not connected, leave open                               |
| F3  | NC           | NC             | Not connected, leave open                               |
| F4  | NC           | NC             | Not connected, leave open                               |
| F5  | GPIO14       | Digital Input  |   |
| F6  | GPIO2        | Digital I/O    |   |
| F7  | GPIO5/UARTTX | Digital Output | UART TX   |
| F8  | GPIO13       | Digital Output |   |
| F9  | GND          | Ground Pin     | Connect to ground                                       |
| F11 | GND          | Ground Pin     | Connect to ground                                       |
| F12 | GND          | Ground Pin     | Connect to ground                                       |

**Minimal configuration:**

- VCC
- GND
- UART Rx, Tx, no flow control

## 2.3 UART Interface

- Default baud rate: 115 200
- Data format: 8, Stop: 1, Parity: none, LSB first
- Rx, Tx, no flow control

## 2.4 Bluetooth Features

- 2 Mbps high-speed PHY, Low Energy long range coded PHY
- Low Energy advertising extensions (advertising on 40 channels total)
- Channel selection algorithm #2
- Low Energy secure connections
- Advertising function without CPU Wake-Up and interaction
- Bluetooth SIG certified Mesh stack (soon)

### 3 Detailed Description

#### 3.1 Dimensions

All dimensions are in millimeters.

| No. | Item   | Dimension | Tolerance | Remark    |
|-----|--------|-----------|-----------|-----------|
| 1   | Width  | 8.70      | ± 0.35    |           |
| 2   | Length | 15.60     | ± 0.35    |           |
| 3   | Height | 1.80      | ± 0.35    | With case |

### 3.2 Footprint

The outer dimensions have a tolerance of  $\pm 0.35$  mm.

All dimensions are in millimeters.

Top View

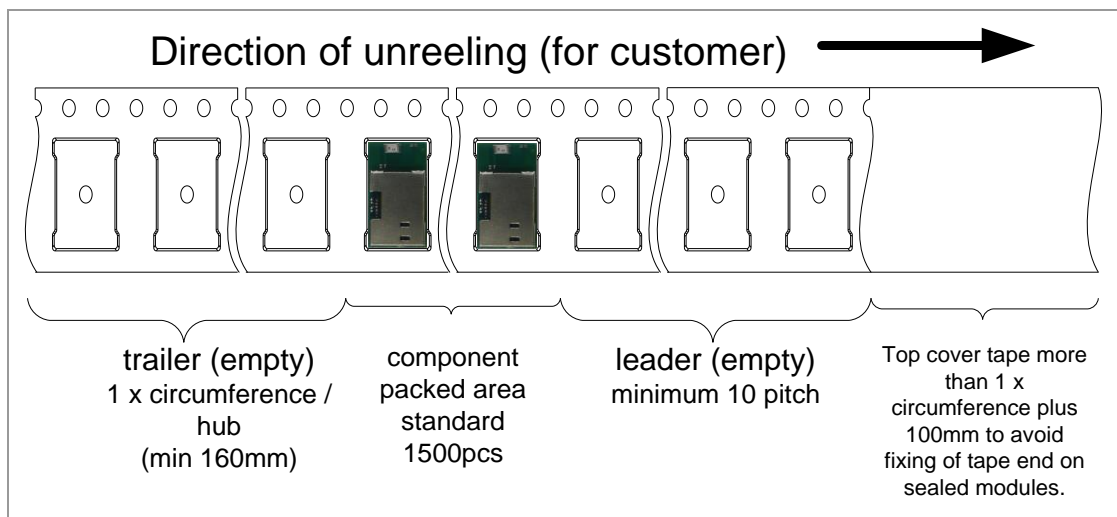

### 3.3 Packaging

The product is an ES status product and will be delivered in the package described below.

#### 3.3.1 Tape Dimensions

#### 3.3.2 Packing in Tape

Empty spaces in the component packed area shall be less than two per reel and those spaces shall not be consecutive.

The top cover tape shall not be found on reel holes and it shall not stick out from the reel.

### 3.3.3 Component Direction

### 3.3.4 Reel Dimension

### 3.3.5 Package Label

#### Example

|         |                                      |
|---------|--------------------------------------|
| (1T)    | Lot code                             |
| (1J)    | MIC ID                               |
| (1P)    | Customer order number, if applicable |
| (2P)    | Order number                         |
| (9D)    | Date code                            |
| (Q)     | Quantity                             |
| (HW/SW) | Hardware/software version            |

### 3.3.6 Total Package

### 3.4 Case Marking

#### Example

|    |   |
|----|---|
| 1  | MIC ID                                    |
| 2  | Brand name                                |
| 3  | Hardware/software version                 |
| 4  | Order number                              |
| 5  | IC ID                                     |
| 6  | Lot code                                  |
| 7  | Engineering Sample marking, if applicable |
| 8  | Marking for Pin 1                         |
| 9  | 2D barcode, for internal usage only       |
| 10 | Bluetooth logo                            |
| 11 | FCC ID                                    |

## 4 Specification

All specifications are over temperature and process, unless indicated otherwise.

### 4.1 Default Test Conditions

Temperature: 25 °C ± 10 °C  
 Humidity: 40 % to 85 % RH  
 Supply Voltage: 3.3 V

### 4.2 Absolute Maximum Ratings

The maximum ratings may not be exceeded under any circumstances, not even momentarily or individually, as permanent damage to the module may result.

| Symbol            | Parameter                         | Condition  | Min. | Typ. | Max.                | Units |
|-------------------|-----------------------------------|--|------|------|---------------------|-------|
| T <sub>STOR</sub> | Storage temperature               |  | -40  |      | 85                  | °C    |
| V <sub>DD</sub>   | Power supply                      |  | -0.3 |      | 3.9                 | mA    |
| V <sub>ESD</sub>  | ESD robustness (Target value)     | All pads, according to human body model (HBM), JEDEC STD 22, method A114 |      |      | 1 000               | V     |
|                   |                                   | According to charged device model (CDM), JEDEC STD 22, method C101       |      |      | 500                 | V     |
| P <sub>RF</sub>   | RF input level                    |  |      |      | 10                  | dBm   |
| V <sub>DIG</sub>  | Voltage on any digital pins       |  | -0.3 |      | V <sub>DD</sub> 0.3 | V     |
| I <sub>IN</sub>   | Input current for any digital pin |  | -10  |      | 10                  | mA    |

### 4.3 Recommended Operating Conditions

The maximum ratings may not be exceeded under any circumstances, not even momentarily or individually, as permanent damage to the module may result.

| Symbol          | Parameter                           | Condition | Min. | Typ. | Max. | Units |
|-----------------|-------------------------------------|-----------|------|------|------|-------|
| T <sub>A</sub>  | Ambient operating temperature range |           | -40  |      | 85   | °C    |
| V <sub>DD</sub> | 3V3 Supply voltage                  |           | 1.8  | 3.3  | 3.6  | V     |

### 4.4 Current Consumption

The current consumption depends on the user scenario, on the setup, and timing in the power modes.

Assume V<sub>DD</sub> = 3.0 V, T<sub>amb</sub> = 25 °C, if nothing else stated.

| Parameter  | Condition   | Min. | Typ. | Max. | Units |
|--|---|------|------|------|-------|
| Current Consumption Of The Digital Circuits At Operation | Bluetooth wireless: not used<br>Built-in flash memory: not used   |      | 1.2  |      | mA    |
| Data Transmission Current Consumption                    | Target value, 1 Mbps, 0 dBm   |      | 5.2  |      | mA    |
|  | Target value, 2 Mbps, 0 dBm   |      | 5.4  |      | mA    |
|  | Target value, 1 Mbps, 8 dBm   |      | 11.3 |      | mA    |
|  | Target value, 2 Mbps, 8 dBm   |      | 11.5 |      | mA    |
| Data Reception Current Consumption                       | Target value, 1 Mbps  |      | 5.1  |      | mA    |
|  | Target value, 2 Mbps  |      | 5.6  |      | mA    |
| Current Consumption In Low Power Mode (Sleep Mode)       | Power supply of CPU: on The oscillation of the sleep clock is operated. Whole of the data is retained.  |      | 2.5  |      | μA    |
| Current Consumption In Low Power Mode (Backup Mode)      | Power supply of CPU: off The oscillation of the sleep clock is operated. Whole of the data is retained. |      | 2.5  |      | μA    |
| Deep Sleep Mode  | Power supply of CPU: off The oscillation of the sleep clock is stopped. No data is retained.            |      | 50   |      | nA    |

## 4.5 Bluetooth

| Parameter                 | Condition  | Min.  | Typ. | Max.  | Units |
|---------------------------|--|-------|------|-------|-------|
| Operation Frequency Range |  | 2 402 |      | 2 480 | MHz   |
| Channel Spacing           | Bluetooth LE   |       | 2    |       | MHz   |
| Output Power              | Maximum setting, measured at module bottom pad                           |       | 8    |       | dBm   |
| Sensitivity               | 1 Mbps, PER = 30.8 % at 1 500 packets with dirty Tx, 37 octets           |       | -95  |       | dBm   |
|                           | 2 Mbps, PER = 30.8 % at 1 500 packets with dirty Tx, 37 octets           |       | -93  |       | dBm   |
|                           | 500 kbps (S = 2), PER = 30.8 % at 1 500 packets with dirty Tx, 37 octets |       | -101 |       | dBm   |
|                           | 125 kbps (S = 8), PER = 30.8 % at 1 500 packets with dirty Tx, 37 octets |       | -105 |       | dBm   |

| Symbol | Parameter          | Condition                                     | Min. | Typ. | Max. | Units |
|--------|--------------------|---|------|------|------|-------|
| 1      | Spurious emissions | Conducted measurement at module RF bottom pad |      | <-30 |      | dBm   |

## 4.6 Reliability Tests

The measurement should be done after the test device has been exposed to room temperature and humidity for one hour.

| No. | Item                                 | Limit  | Condition   |
|-----|--------------------------------------|--|---|
| 1   | Variable Vibration Test              | Electrical parameters should be within specification | Freq.: 20~2 000 Hz, Acc.: 17-50 G, Sweep: 8 min, 2 hours, For: XYZ axis |
| 2   | Shock Drop Test                      | Electrical parameters should be within specification | Drop parts on concrete from a height of 1 m for 3 times                 |
| 3   | Heat-Shock/ Temperature Cycling Test | Electrical parameters should be within specification | At -40 °C and 85 °C for 1 h/cycle<br>Total = 300 cycles                 |
| 4   | Temperature Humidity Bias Test       | Electrical parameters should be within specification | At 60 °C, 85 % r.H., 300 h  |
| 5   | Low Temperature Storage Life Test    | Electrical parameters should be within specification | At -40 °C, 300 h  |
| 6   | High Temperature Storage Life Test   | Electrical parameters should be within specification | At 85 °C, 300 h   |

## 4.7 Recommended Soldering Profile

- Reflow permissible cycles: 2
- Due to module weight, opposite side reflow is prohibited.
- More than 75 percent of the soldering area shall be coated by solder.
- The soldering profiles should be adhered to in order to prevent electrical or mechanical damage.
- Soldering profile assumes lead-free soldering.

## 5 Cautions

Failure to follow the guidelines set forth in this document may result in degrading of the module functions and damage to the module.

### 5.1 Design Notes

1. Follow the conditions written in this specification, especially the control signals of this module.
2. The supply voltage should abide by the maximum ratings (⇒ [4.2 Absolute Maximum Ratings](#)).
3. The supply voltage must be free of AC ripple voltage (for example from a battery or a low noise regulator output). For noisy supply voltages, provide a decoupling circuit (for example a ferrite in series connection and a bypass capacitor to ground of at least 47  $\mu\text{F}$  directly at the module).
4. This module should not be mechanically stressed when installed.
5. Keep this module away from heat. Heat is the major cause of decreasing the life time of these modules.
6. Avoid assembly and use of the target equipment in conditions where the module temperature may exceed the maximum tolerance.
7. Keep this module away from other high frequency circuits.
8. Refer to the recommended pattern when designing a board.

### 5.2 Installation Notes

1. Reflow soldering is possible twice based on the conditions set forth in ⇒ [4.7 Recommended Soldering Profile](#). Set up the temperature at the soldering portion of this module according to this reflow profile.
2. Carefully position the module so that the heat will not burn into printed circuit boards or affect other components that are susceptible to heat.
3. Carefully locate the module, to avoid an increased temperature caused by heat generated by neighboring components.
4. If a vinyl-covered wire comes into contact with the module, the wire cover will melt and generate toxic gas, damaging the insulation. Never allow contact between a vinyl cover and these modules to occur.
5. This module should not be mechanically stressed or vibrated when reflowed.
6. To repair the board by hand soldering, follow the conditions set forth in this chapter.
7. Do not wash this product.
8. Pressing on parts of the metal cover or fastening objects to the metal will cause damage to the module.

### 5.3 Usage Condition Notes

1. Take measures to protect the module against static electricity.  
If pulses or transient loads (a large load, which is suddenly applied) are applied to the modules, check and evaluate their operation before assembly of the final products.
2. Do not use dropped modules.
3. Do not touch, damage, or soil the pins.
4. Follow the recommended condition ratings about the power supply applied to this module.
5. Electrode peeling strength: Do not apply a force of more than 4.9 N in any direction on the soldered module.
6. Pressing on parts of the metal cover or fastening objects to the metal cover will cause damage.
7. These modules are intended for general purpose and standard use in general electronic equipment, such as home appliances, office equipment, information, and communication equipment.

### 5.4 Storage Notes

1. The module should not be stressed mechanically during storage.
2. Do not store these modules in the following conditions or the performance characteristics of the module, such as RF performance will be adversely affected:
  - Storage in salty air or in an environment with a high concentration of corrosive gas, such as Cl<sub>2</sub>, H<sub>2</sub>S, NH<sub>3</sub>, SO<sub>2</sub>, or NO<sub>x</sub>,
  - Storage in direct sunlight,
  - Storage in an environment where the temperature may be outside the range of 5 °C to 35 °C, or where the humidity may be outside the 45 % to 85 % range,
  - Storage of the modules for more than one year after the date of delivery storage period: Please check the adhesive strength of the embossed tape and soldering after 6 months of storage.
3. Keep this module away from water, poisonous gas, and corrosive gas.
4. This module should not be stressed or shocked when transported.
5. Follow the specification when stacking packed crates (max. 10).

### 5.5 Safety Cautions

These specifications are intended to preserve the quality assurance of products and individual components.

Before use, check and evaluate the operation when mounted on your products. Abide by these specifications without deviation when using the products. These products may short-circuit. If electrical shocks, smoke, fire, and/or accidents involving human life are anticipated when a short circuit occurs, provide the following failsafe functions as a minimum:

1. Ensure the safety of the whole system by installing a protection circuit and a protection device.
2. Ensure the safety of the whole system by installing a redundant circuit or another system to prevent a single fault causing an unsafe status.

## 5.6 Other Cautions

1. Do not use the module for other purposes than those listed in section ⇒ [5.3 Usage Condition Notes](#).
2. Be sure to provide an appropriate fail-safe function on your product to prevent any additional damage that may be caused by the abnormal function or the failure of the module.
3. This module has been manufactured without any ozone chemical controlled under the Montreal Protocol.
4. These modules are not intended for use under the special conditions shown below. Before using these modules under such special conditions, carefully check their performance and reliability under the said special conditions to determine whether or not they can be used in such a manner:
  - In liquid, such as water, salt water, oil, alkali, or organic solvent, or in places where liquid may splash,
  - In direct sunlight, outdoors, or in a dusty environment,
  - In an environment where condensation occurs,
  - In an environment with a high concentration of harmful gas (e. g. salty air, HCl, Cl<sub>2</sub>, SO<sub>2</sub>, H<sub>2</sub>S, NH<sub>3</sub>, and NO<sub>x</sub>).
5. If an abnormal voltage is applied due to a problem occurring in other components or circuits, replace these modules with new modules, because they may not be able to provide normal performance even if their electronic characteristics and appearances appear satisfactory.

Please refer to the Panasonic website for for further information  
⇒ [7.2.2 Product Information](#).

## **5.7 Restricted Use**

### **5.7.1 Life Support Policy**

This Panasonic Industrial Devices Europe GmbH product is not designed for use in life support appliances, devices, or systems where malfunction can reasonably be expected to result in a significant personal injury to the user, or as a critical component in any life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

Panasonic customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Panasonic Industrial Devices Europe GmbH for any damages resulting.

### **5.7.2 Restricted End Use**

This Panasonic Industrial Devices Europe GmbH product is not designed for any restricted activity that supports the development, production, handling usage, maintenance, storage, inventory or proliferation of any weapons or military use.

Transfer, export, re-export, usage or reselling of this product to any destination, end user or any end use prohibited by the European Union, United States or any other applicable law is strictly prohibited.

## 6 Regulatory and Certification Information

### 6.1 Federal Communications Commission (FCC) for US

#### 6.1.1 FCC Notice

The PAN1762 including the antennas, which are listed in [⇒ 6.1.5 Approved Antenna List](#), complies with Part 15 of the FCC Rules.

The device meets the requirements for modular transmitter approval as detailed in FCC public Notice DA00-1407. The transmitter operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

#### 6.1.2 Caution

The FCC requires the user to be notified that any changes or modifications made to this device that are not expressly approved by Panasonic Industrial Devices Europe GmbH may void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna,
- Increase the separation between the equipment and receiver,
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected,
- Consult the dealer or an experienced radio/TV technician for help.

### 6.1.3 Label Requirements

The OEM must ensure that FCC labelling requirements are met. This includes a clearly visible label on the outside of the OEM enclosure specifying the appropriate Panasonic FCC identifier for this product as well as the FCC Notice above.

The FCC identifier is **FCC ID: T7V1762**.

This FCC identifier is valid for the PAN1762. The end product must in any case be labelled on the exterior with:

"Contains FCC ID: T7V1762"

### 6.1.4 Antenna Warning

This antenna warning refers to the test device with the model number PAN1762

⇒ [7.1 Ordering Information](#)

The device is tested with a standard SMA connector and with the antenna listed below. When integrated into the OEM's product, these fixed antennas require installation preventing end users from replacing them with non-approved antennas. Any antenna not in the following table must be tested to comply with FCC Section 15.203 for unique antenna connectors and with Section 15.247 for emissions. The FCC identifier for the device with the antenna listed in ⇒ [6.1.5 Approved Antenna List](#) is the same (**FCC ID: T7V1762**).

### 6.1.5 Approved Antenna List

| Item | Part Number         | Manufacturer | Frequency Band | Type         | Max. Gain (dBi) |
|------|---------------------|--------------|----------------|--------------|-----------------|
| 1    | ANT016008LCS2442MA1 | TDK          | 2.4 GHz        | Chip antenna | 1.6             |

### 6.1.6 RF Exposure

To comply with FCC RF Exposure requirements, the OEM must ensure that only antennas from the Approved Antenna List are installed ⇒ [6.1.5 Approved Antenna List](#).

The preceding statement must be included as a CAUTION statement in manuals for products operating with the approved antennas in the previous table to alert users on FCC RF Exposure compliance.

Any notification to the end user of installation or removal instructions about the integrated radio module is not allowed.

The radiated output power of the PAN1762 with a mounted ceramic antenna (**FCC ID: T7V1762**) is below the FCC radio frequency exposure limits. Nevertheless, the PAN1762 shall be used in such a manner that the potential for human contact during normal operation is minimized.

End users may not be provided with the module installation instructions. OEM integrators and end users must be provided with transmitter operating conditions for satisfying RF exposure compliance.

## 6.2 Innovation, Science, and Economic Development (ISED) for Canada

### English

The PAN1762 is licensed to meet the regulatory requirements of ISED.

License ID: **IC: 216Q-1762**

Manufacturers of mobile, fixed or portable devices incorporating this module are advised to clarify any regulatory questions and ensure compliance for SAR and/or RF exposure limits. Users can obtain Canadian information on RF exposure and compliance from [www.ic.gc.ca](http://www.ic.gc.ca).

This device has been designed to operate with the antennas listed in ⇒ [6.1.5 Approved Antenna List](#), having a maximum gain of +1.6 dBi. Antennas not included in this list or having a gain greater than +1.6 dBi are strictly prohibited for use with this device. The required antenna impedance is 50 ohms. The antenna used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Due to the model size, the IC identifier is displayed in the installation instruction only and it cannot be displayed on the module's label due to the limited size.

### French

PAN1762 est garanti conforme aux dispositions réglementaires d'Industry Canada (ISED).

License: **IC: 216Q-1762**

Il est recommandé aux fabricants d'appareils fixes, mobiles ou portables de consulter la réglementation en vigueur et de vérifier la conformité de leurs produits relativement aux limites d'exposition aux rayonnements radiofréquence ainsi qu'au débit d'absorption spécifique maximum autorisé.

Des informations pour les utilisateurs sur la réglementation Canadienne concernant l'exposition aux rayonnements RF sont disponibles sur le site [www.ic.gc.ca](http://www.ic.gc.ca).

Ce produit a été développé pour fonctionner spécifiquement avec les antennes listées dans le tableau ⇒ [6.1.5 Approved Antenna List](#), présentant un gain maximum de 1.6 dBi. Des antennes autres que celles listées ici, ou présentant un gain supérieur à 1.6 dBi ne doivent en aucune circonstance être utilisées en combinaison avec ce produit. L'impédance des antennes compatibles est 50 Ohm. L'antenne utilisée avec ce produit ne doit ni être située à proximité d'une autre antenne ou d'un autre émetteur, ni être utilisée conjointement avec une autre antenne ou un autre émetteur.

En raison de la taille du produit, l'identifiant IC est fourni dans le manuel d'installation.

### 6.2.1 IC Notice

#### English

The device PAN1762 (⇒ [7.1 Ordering Information](#)), including the antennas (⇒ [6.1.5 Approved Antenna List](#)), complies with Canada RSS-GEN Rules. The device meets the requirements for modular transmitter approval as detailed in RSS-Gen.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

#### French

Le présent appareil PAN1762 (⇒ [7.1 Ordering Information](#)), les antennes y compris (⇒ [6.1.5 Approved Antenna List](#)), est conforme aux CNR-Gen d'Industrie Canada applicables aux appareils radio exempts de licence.

L'exploitation est autorisée aux deux conditions suivantes:

1. L'appareil ne doit pas produire de brouillage, et
2. L'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

## 6.2.2 Labeling Requirements

### English

#### Labeling Requirements

The OEM must ensure that IC labelling requirements are met. This includes a clearly visible label on the outside of the OEM enclosure specifying the appropriate Panasonic IC identifier for this product as well as the IC Notice above.

The IC identifier is:

**IC: 216Q-1762**

This IC identifier is valid for all PAN1762 modules ⇒ [7.1 Ordering Information](#). In any case, the end product must be labelled on the exterior with:

"Contains IC: 216Q-1762"

### French

#### Obligations d'étiquetage

Les fabricants d'équipements d'origine (FEO) – en anglais Original Equipment Manufacturer (OEM) – doivent s'assurer que les obligations d'étiquetage IC du produit final sont remplies. Ces obligations incluent une étiquette clairement visible à l'extérieur de l'emballage externe, comportant l'identifiant IC du module Panasonic inclus, ainsi que la notification ci-dessus.

L' identifiant IC est:

**IC: 216Q-1762**

Cet identifiant est valide pour tous les modules PAN1762 ⇒ [7.1 Ordering Information](#). Dans tous les cas les produits finaux doivent indiquer sur leur emballage externe la mention suivante:

"Contient IC: 216Q-1762"

## 6.3 Japanese Radio Law Compliance

This device is granted pursuant to the Japanese Radio Law (電波法).

This device should not be modified (otherwise the granted designation number will become invalid).

The MIC ID is: [R]202-SMH031

## 6.4 European Conformity According to RED (2014/53/EU)

All modules described in this Product Specification comply with the standards according to the following LVD (2014/35/EU), EMC-D (2014/30/EU) together with RED (2014/53/EU) articles:

|                     |   |
|---------------------|---|
| 3.1a Safety/Health: | EN 62368-1:2014<br>EN 62311:2008                            |
| 3.1b EMC:           | EN 301 489-1 V2.1.1:2017-02<br>EN 301 489-17 V3.1.1:2017-02 |
| 3.2 Radio:          | EN 300 328 V2.1.1:2016-11                                   |

As a result of the conformity assessment procedure described in 2014/53/EU Directive, the end customer equipment should be labelled as follows:

The end customer has to assure that the device has a distance of more than 20 cm from the human body under all circumstances.

The end customer equipment must meet the actual Safety/Health requirements according to RED.

PAN1762 and its model versions in the specified reference design can be used in all countries of the European Economic Area (Member States of the EU, European Free Trade Association States [Iceland, Liechtenstein, Norway]), Monaco, San Marino, Andorra, and Turkey.

## 6.5 Bluetooth

Bluetooth end products which integrate the PAN1762 need to receive the following IDs at creation:

| Bluetooth 5.0      | Declaration ID | QDID   |
|--------------------|----------------|--------|
| Component (Tested) | D041739        | 118932 |
| Component (Tested) | D039178        | 119076 |
| End Product        | D044293        | 121739 |

**Bluetooth Marks**

According to the Bluetooth SIG, the PAN1762 fulfills the criteria to label your product as a Bluetooth device:

For further information please refer to the Bluetooth website [www.bluetooth.com](http://www.bluetooth.com).

**6.6 RoHS and REACH Declaration**

The latest declaration of environmental compatibility (Restriction of Hazardous Substances, RoHS and Registration, Evaluation, Authorisation and Restriction of Chemicals, REACH) for supplied products can be found on the Panasonic website in the section “Downloads” of the respective product ⇒ [7.2.2 Product Information](#).

## 7 Appendix

### 7.1 Ordering Information

#### Variants and Versions

| Order Number              | Brand Name | Description                 | MOQ <sup>1</sup> |
|---------------------------|------------|-----------------------------|------------------|
| ENW89853A1KF <sup>2</sup> | PAN1762    | Bluetooth Low Energy Module | 1 500            |

---

<sup>1</sup> Abbreviation for Minimum Order Quantity (MOQ). The default MOQ for mass production is 1 500 pieces, fewer only on customer demand. Samples for evaluation can be delivered at any quantity via the distribution channels.

<sup>2</sup> Samples are available on customer demand.

## 7.2 Contact Details

### 7.2.1 Contact Us

Please contact your local Panasonic Sales office for details on additional product options and services:

For Panasonic Sales assistance in the **EU**, visit

<https://eu.industrial.panasonic.com/about-us/contact-us>

Email: [wireless@eu.panasonic.com](mailto:wireless@eu.panasonic.com)

For Panasonic Sales assistance in **North America**, visit the Panasonic “Sales & Support” website to find assistance near you at

<https://na.industrial.panasonic.com/distributors>

Please visit the **Panasonic Wireless Technical Forum** to submit a question at

<https://forum.na.industrial.panasonic.com>

### 7.2.2 Product Information

Please refer to the Panasonic Wireless Connectivity website for further information on our products and related documents:

For complete Panasonic product details in the **EU**, visit

<http://pideu.panasonic.de/products/wireless-modules.html>

For complete Panasonic product details in **North America**, visit
