Declaration discontinue transmission

Dear Ladies and Gentleman,

Here with we, **Harman Becker Automotive Systems GmbH**,
Becker-Goering-Str. 16, 76307 Karlsbad, Germany

declare that the telematic unit

Model: Hermes 2.1

fulfills the following FCC-Requirement:

(c) The device shall automatically discontinue transmission in case of either absence of information to transmit or operational failure. These provisions are not intended to preclude the transmission of control or signalling information or the use of repetitive codes used by certain digital technologies to complete frame or burst intervals.

Explanation: The default state of our Hermes 2.1 unit is the RX-Mode. If there is no information to transmit the Hermes unit will switch to RX mode. If there are failures during communication our device has the following strategy - depending on the failure code the unit directly stops or has a 3 times retry strategy. After this retry the unit will stop TX and switch in RX mode.

In case of any question please do not hesitate and contact us – thank you.

Sincerely,

Stefan Blaschek
