

- Middle Channel:

The peak above the limit is the carrier frequency.

- High Channel:

The peak above the limit is the carrier frequency.

• **8-DPSK modulation (3DH5)**

- Low Channel:

The peak above the limit is the carrier frequency.

- Middle Channel:

The peak above the limit is the carrier frequency.

- High Channel:

The peak above the limit is the carrier frequency.

**FREQUENCY RANGE 3 - 17 GHz:**

• **GFSK modulation (DH5)**

- Low Channel:

- Middle Channel:

- High Channel:

• Pi/4-DQPSK modulation (2DH5)

- Low Channel:

- Middle Channel:

- High Channel:

• 8-DPSK modulation (3DH5)

- Low Channel:

- Middle Channel:
