To whom it may concern

Ulm, 27.03.2008

Differences: UHP Low 7103 and UHP High 7104

Sirs,

we, Harman/Becker Automotive Systems GmbH hereby declare that the **UHP Low 7103** and **UHP High 7104** variants are identical for Radio Type Approval purposes.

That regards to radio modules, PCB, output power, design and used plastic materials.

The two variants differ only regarding the interface of the UHP to the CAN bus.

To whom it may concern

Ulm, 27.03.2008

Differences: UHP High 7104 and UHP Embedded 7105

Sirs,

we, Harman/Becker Automotive Systems GmbH hereby declare that the **UHP High 7104** is a subset of **UHP Embedded 7105** from a functional and design point of view. Circuits, electrical components and connectors which are part of **UHP High 7104** are also part of **UHP Embedded 7105**.

The **UHP Embedded 7105** supports in addition an internal GSM module and the related functionality.
