WiQ Portal Gateway Antennas

BSXL antennas are lightweight and can easily be installed by one man. As a rule, standard mounting procedures for base station installation should be followed.

The BSMNT2 mount provides a simple method for installation. It reduces the amount of

BASE STATION ANTENNA

When installing your feed line to the antenna, it should be attached to the exposed "H" connector. A connector boot is supplied to protect the connection. If you choose to tape over the connection, do not tape around the aluminum base of the antenna.

CAUTION!
DO NOT TAPE UP AROUND THE BASE OF THIS ANTENNA. THE SYSTEM MUST NOT BE BLOCKED.
