To Whom It May Concern,

This document is intended to clarify the markings on a set of Skyetek M8 UHF RFID Reader modules utilized by our customer Adasa for FCC certification.

Forty-eight production modules were marked 'PCA2.0.1', and were produced between 4-15-06 and 4-18-06. On all subsequent M8 production modules the equivalent markings are 'PCA2.0.2'. The only difference between the two modules is that two hand-soldered connections on the 'PCA2.0.1' are replaced by traces internal to the PCB on the 'PCA2.0.2' boards.

There is no functionality or component differences between the modules and 2.0.1 modules are equivalent to 2.0.2 for all purposes. The PCB labeling was changed as part of normal operational sequencing when there is any modification to a PCB, however small.

Regards,

Mark Swanson
Director of Operations
SkyeTek, Inc.
