Hi Helen,

Acknowledged. Due to change of page number in test report, I uploaded updated "user manual, test report, set-up photo, internal photos, external photos, and FCC ID label info" files.

Thanks and have a nice day.

Question #1: The user manual does not contain labelling requirement as specified in FCC15.19. Please update the user manual.

Question #2: The user manual indicates "The antenna(s) used for this device must be installed to provide a separation distance of at least 20 cm from all persons", also MPE calculation is provided in the filing. Please note this is a portable device when used in laptop position, it is not in mobile configuration. Since the power is below low threshold of $60/f(\text{GHz}) = 24.58\text{mW}$, as defined in TCB exclusion list 07-2002, this portable device is exempt from SAR evaluation. Please remove MPE calculation from the test report, also please remove 20cm restriction from the user manual.

Question #3: This devcie is a Bluetooth USB dongle, it meets the definition of a personal computer peripheral, the digital portion of the EUT must also be authorized, through Certification, or DoC. If it is through certification, please submit a separate application under equipment class of JBP (so you need to file as composite device). If it is through DoC, then please update the FCC ID label format to include FCC DoC logo.

Best Regards,
Helen Zhao
