Subject: Class I Permissive Change for FCC ID: TA8AKRC11819-1

Gentlemen;

Ericsson AB requests a Permissive Change Class I for the above mentioned FCC Identifier.

This base station transceiver (Radio Unit – RU) is changed in the mounting method of the six output power amplifier transistors. Each transistor are now mounted with a bridge over the transistor that secures the contact pressure from the transistors contact points to the PCB board resp the heat sink. This bridge is fixed by the same two screws that earlier just secured one of the transistor contact points to the PCB board resp the heat sink. The other two transistor contact points were then soldered. The soldering is now eliminated of environment reasons.

Ericsson AB requests confidentiality under CFR 0.459 according to attached letter.

We further certify that the applicant nor any party to the application is subject to a denial of Federal benefits, that includes FCC benefits, pursuant to section 5301 of the Anti-Drug abuse Act of 1988, 21 U.S.C. Section 862.

Ericsson AB accept by this request the agreement set out in the document "Bilaga SPCR 125 -Avtal om marknads kontroll för radioutrustning certifierad för USA-marknaden"

If additional information is needed, please contact me on the below listed number.

Sincerely,

Larry Lindström
