Subject: Permissive Change for FCC ID: TA8AKRC11894-1

To Whom It May Concern:

Ericsson AB requests a Permissive Change class II for the above mentioned FCC Identifier.

Changes have been made in Hardware and Software which have been judged as permissive change class II, described in exhibit 12.

This base station transceiver (Radio Unit – RUS 01 B12) is designed for use in 3GPP Long Term Evolution (LTE) within the Third Generation Partnership Project (3GPP) for the Universal Mobile Telephone System (UMTS 3G) mobile system standard (cellular telephone system). The transmitter will operate from 729 MHz to 745 MHz with 5, 10 and 15 MHz Channel Bandwidth. The receiver circuit supports 699 MHz to 715 MHz. This base station transceiver (RU) supports modulation type QPSK, 16QAM and 64QAM. This base station transceiver is appropriate to use in different Ericsson radio base stations without re-measurement and re-filing when introducing a new base station type. The base station transceiver operates in the broadband services as per 47 CFR Part 27 subpart H. It meets the requirements of 3GPP specification for operation in Universal Mobile Telephone System, UMTS 3G, in the radio access referred to as the Evolved UMTS Terrestrial Radio Access Network, E-UTRAN.

This base station transceiver (RU) will in normal mode operate at a nominal power out of 20, 40 or 60 watts at the output connector.

This application is only valid for the model specified in the Exhibit 12 circuit description.

Ericsson AB requests confidentiality under CFR 0.459 according to attached letter.

We further certify that the applicant nor any party to the application is subject to a denial of Federal benefits, that includes FCC benefits, pursuant to section 5301 of the Anti-Drug abuse Act of 1988, 21 U.S.C. Section 862.

Ericsson AB accept by this request the agreement set out in the document "Bilaga SPCR 125 -Avtal om marknadskontroll för radioutrustning certifierad för USA-marknaden".
