**Object Data**

Firmware version: 4.73 SP5  
 Installed options: B2, B16, B24

**Calibration Procedure**

The calibration was performed according to service manual 1302.6163.82-04 following the procedures as described in calibration guideline VDI/VDE/DGQ/DKD 2622 part 12 by comparing the relevant measurands of the instrument under test with the numerical values of the quantities represented by the reference standards used. The receiver fulfills the requirements of the international standard CISPR 16-1-1:2010+A1:2010.

**Measurement Results**

see from page 4 on

All measurement results are metrologically traced to the International System of Units (SI) by means of an unbroken chain of calibrations to relevant primary standards of the SI units of measurements.

**Statement of Compliance**

Incoming: All measured values are within the datasheet specifications.

Outgoing: All measured values are within the datasheet specifications.
