Gegenstand <i>Object</i>	EMI Test Receiver
Hersteller <i>Manufacturer</i>	ROHDE & SCHWARZ
Typ <i>Type</i>	ESU26
Fabrikat/Serien-Nr. <i>Serial number</i>	100409 Inventarienummer: 901553
Auftraggeber <i>Customer</i>	RISE Research Institutes of Sweden Brinellgatan 4 504 62 Borås Sweden
Auftragsnummer <i>Order No.</i>	226298
Anzahl der Seiten des Kalibrierscheins <i>Number of pages of the certificate</i>	30
Ort und Datum der Kalibrierung <i>Place and date of calibration</i>	Borås, 2019-07-18

Dieser Kalibrierschein dokumentiert die Rückführung auf nationale Normale zur Darstellung der Einheiten in Übereinstimmung mit dem Internationalen Einheitensystem (SI).

Die DAkkS ist Unterzeichner der multilateralen Übereinkommen der European cooperation for Accreditation (EA) und der International Laboratory Accreditation Cooperation (ILAC) zur gegenseitigen Anerkennung der Kalibrierscheine.

Für die Einhaltung einer angemessenen Frist zur Wiederholung der Kalibrierung ist der Benutzer verantwortlich.

This calibration certificate documents the traceability to national standards, which realize the units of measurement according to the International System of Units (SI).

The DAkkS is signatory to the multilateral agreements of the European cooperation for Accreditation (EA) and of the International Laboratory Accreditation Cooperation (ILAC) for the mutual recognition of calibration certificates.

The user is obliged to have the object recalibrated at appropriate intervals.

Dieser Kalibrierschein darf nur vollständig und unverändert weiterverbreitet werden. Auszüge oder Änderungen bedürfen der Genehmigung sowohl der Deutschen Akkreditierungsstelle als auch des ausstellenden Kalibrierlaboratoriums. Kalibrierscheine ohne Unterschrift haben keine Gültigkeit.

This calibration certificate may not be reproduced other than in full except with the permission of both the German Accreditation Body and the issuing laboratory. Calibration certificates without signature are not valid.

Object Data

Firmware version: 4.73
Installed options: B2, B16, B24

Calibration Procedure

The calibration was performed according to service manual 1302.6163.82-04 following the procedures as described in calibration guideline VDI/VDE/DGQ/DKD 2622 part 12 by comparing the relevant measurands of the instrument under test with the numerical values of the quantities represented by the reference standards used. The receiver fulfills the requirements of the international standard CISPR 16-1-1:2010+A1:2010.

Measurement Results

see from page 4 on

All measurement results are metrologically traced to the International System of Units (SI) by means of an unbroken chain of calibrations to relevant primary standards of the SI units of measurements.

Statement of Compliance

Incoming: All measured values are within the datasheet specifications.

Outgoing: All measured values are within the datasheet specifications.

Measurement Uncertainty

Together with the results on the following pages the extended measurement uncertainty is stated which was calculated from the standard measurement uncertainty multiplied by the coverage factor $k = 2$. It was determined in accordance with EA-4/02 M: 2013. The true value is located in the corresponding interval with a probability of 95 %.

Environmental Conditions

Ambient temperature $(23 \pm 3) \text{ }^\circ\text{C}$ Relative humidity $(45 \pm 30) \%$

Comments on the measured results

The measurement results in the test report stated below have been tested for compliance with the given specifications and marked if necessary. In doing so, the associated uncertainty of measurement has been taken into account.

The following abbreviations may be used in this certificate:

- ¹ Measurement results that are not covered by the DAkkS accreditation.
- {a} No measurement uncertainty stated because the errors always add together. So it is sure that a measurement result evaluated as "PASS" is pass.
- {b} The measurement uncertainty depends on the measurement result. The stated measurement uncertainty is valid for the close area around the specification. Measurement results outside the close area have a higher measurement uncertainty but are within the specification.
- {c} , ² Functional test, therefore no measurement uncertainty is stated.
- {d} Typical value, refer to performance test.
- {e} The measurement uncertainty is taken into account when setting the measuring system.
- DL , DT Data Limit for symmetrical tolerance limits
- UGB Uncertainty guard band: Measuring uncertainty violates the data sheet tolerance
- UGB1 , u Measurement results marked as UGB1 show conformity with a probability of >50 % and <95 %.
- UGB2 , u Measurement results marked as UGB2 show non-conformity with a probability of >50 % and <95 %.
- FAIL , f Measurement results marked as FAIL show non-conformity
- n. i. not installed: Does not apply due to instrument configuration
- n. m. not measured
- ref. Reference value, used for relative measurements

Test Description	Lower Limit	Result Measured	Upper Limit	Uncertainty
21.5 Amplitude Modulation				
carrier level 1000 MHz	-5,0 dBm	n. i.	3,0 dBm	0,5 dB
upper sideband 1001 MHz	-8,0 dBc	n. i.	-4,0 dBc	0,5 dB
lower sideband 999 MHz	-8,0 dBc	n. i.	-4,0 dBc	0,5 dB
21.6 Frequency Modulation				
carrier level 1000 MHz	-5,0 dBm	n. i.	1,0 dBm	0,5 dB
upper sideband 1000.1 MHz	-6,0 dBc	n. i.	-3,0 dBc	0,5 dB
lower sideband 999.9 MHz	-6,0 dBc	n. i.	-3,0 dBc	0,5 dB
