Re: FCC ID: TAI0000TB1 voice transmission options

To Whom It May Concern:

The voice transmission of this device can be altered by the manufacturer. The inner case includes a factory programmable voice memory unit that is able to provide a variety of voice messages. The preferred voice transmission is the repetition of the word "mayday" or other similar indication of distress as is permitted by the relevant local regulations.

The voice transmission options that are currently available are as follows:

"Help Emergency"

"MayDay"

"Track Me"

Sincerely,

Razlin Technologies
