RE: Guangdong MD Consumer Electric Manufacturing Co., Ltd.

FCC ID: TAPMC-JSH15A

After a review of the submitted information, I have a few comments on the above referenced Application. Depending on your responses, kindly understand there may be additional comments.

- 1) FYI....Regarding the block diagram, we were looking for the addition of 20-30 kHz specified as the operating frequency to the appropriate oscillator portion of the device. Please take care to ensure this in the future.
- 2) FYI....We will accept your distance correction factor explanation. Please note that any allowance beyond the 40 dB per decade would require physically testing the roll off factor.

Timothy R. Johnson
Examining Engineer
