

K-band antennas MDT 86552, 6386 & 6366

Features

- For high and low gain applications
- Die cast
- Priced for Commercial Applications

Description

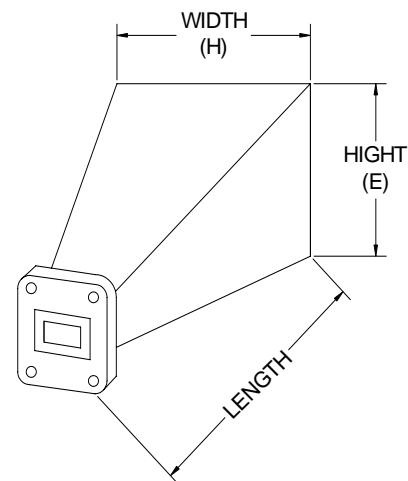

MDT die cast K-band horn antennas are designed to be easily integrated into low cost, commercial sensor applications. Providing a variety of gains and beam patterns these horns are available from stock as a cost effective alternative to custom tooled horns.

	GAIN dB	3dB width E/H deg.	Length cm	Width cm (H)	Height cm (E)
MDT86552	16	20/27	4.3	4.6	3.5
MDT6366	12	34/47	1.3	3.1	2.3
MDT6386	17	17/26	4.9	4.2	3.5

Note: MDT6386 has an integrated harmonic filter

Ordering Information

All antennas have individual drawings available by request. Please confirm requirements for harmonic filters at time of order.

Better by Design.
