SAFETY PRECAUTIONS:

- Do not use the product near small children or animals. The detachable head can pose a choking hazard.
- Adult supervision is recommended at all times.
- Avoid water, sand and snow when operating your vehicle. Never submerge any portion of the product in water.
- Never use the product near sources of heat, under direct sunlight or extreme temperatures as this may damage internal components.

BATTERY WARNING:

- Do not use old or damaged batteries.
- Do not use alkaline, standard (carbon zinc), or rechargeable (nickel-cadmium) batteries.
- Insert batteries only the correct polarity. Do not short-circuit the supply terminals.
- Remove batteries when not in use. Remove or disconnect the negative terminal on the back of the robot.
- Do not try to recharge the batteries; recharge only in a device specifically designed for this purpose.
- Always use proper and safe handling of batteries under adult supervision.

NOTE: THIS PACKAGE FOR REFERENCE AS IT CONTAINS IMPORTANT INFORMATION.

OPERATING INSTRUCTIONS

Each robot requires 3 "AAA" 1.5V batteries (not included). Each remote control requires 1 9V battery (not included). When changing batteries, adult supervision is required. Use alkaline batteries for best performance.

- Carefully remove them from the package.
- Locate the battery compartment on the back of each robot, as well as each remote.
- On robots, loosen the screws and remove battery doors. Slide doors open on RC units.
- Insert "AAA" batteries inside robots while observing the correct polarity in each compartment (see diagrams). Insert one 9V battery into each remote control.
- Replace the battery doors and tighten screws.
- Switch robot and remote control power switches to the "ON" position. The power switch is located on the side of the robot.

NOTE: Before use, adjust the robots to make sure both feet have good contact with the ground. Use one as a lead, the other as a target for test results.

LEFT JOYSTICK **RIGHT JOYSTICK**

OPERATING CONTROLS

- Push left joystick down to spin robot.
- Push left joystick left to spin robot.
- Push left joystick right to spin robot.
- Push left joystick up and the right joystick down to spin robot.
- Push left joystick up and the right joystick up to spin robot.

HOW TO PLAY

There are sensors located beneath each robot's chest plate. The object of the game is to knock the opponent's lower sensor off of its robot's chest with the chest that carries the robot's head. When the head quits, the power will be cut off. To control the robot, the head has to be attached to the body. To begin the next game a knock sensor on the neck and push/pull down until it clicks on once.

WARNING: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
