**Overall Evaluation letter for Bartec MC9060G ex  
FCC id: TBUMC9060Gex**

This product is a modified version of the Symbol MC9060B.

This contains 2 previously tested and approved modules:

- 802.11 WLAN previously approved under H9P2164436
- Bluetooth transmitter previously approved under H9P2164381

This product is compliant to FCC Part 15.

The following considerations were made

**1: RF Exposure.**

The product has been submitted for Mobile evaluation.

The client confirmed that unlike the Symbol MC9060B, from which it is derived, no body worn accessories are supplied or intended to be used.

No MPE calculations have been made as both transmitters are categorically excluded from evaluation and well below any threshold.

**2: Test Data**

The primary Radio test data came from reports on the original radio modules.

No significant changes have occurred in the Part 15 requirements since the testing took place.

**3: Statement of similarity**

Symbol have confirmed that the Radio aspects are unchanged from the original radio module approvals

This model is intended to be used in hazardous environments. The only changes are to improve the Spurious emissions and safety aspects.

**4: Corrections**

The Grantee have committed to correct erroneous items on the Label and in the User manual.

On the basis of these statements the original exhibits have been uploaded with their commitment letters.

Yours sincerely

Hilton Carr

Task Manager, Certification and Technical Development
