

Operational Principle

This device is a streaming stick, a small add-on accessory that a consumer can plug in to any television that includes an HDMI port. The streaming stick works seamlessly with the TV to provide the user with a WiFi connection to streaming media.

It supports a 2(TX)/2(RX) antenna delivery, comply with IEEE802.11 a,b,g/n standard. The chipset achieves robust high throughput from a long distance, delivering HD video, fun and friendly way to instantly stream entertainment and play casual games.

The antenna is dual band antenna, support 2.4/5GHz radio.

For more detailed instruction, please take a look at the user's manual.
