

## Operation Description

The Splash R/C Electronic Friendly Fish is powered by 3 X 1.5V button cell. It has three button keys in the center of EUT. When the button key is pressed once, it will transmit a radio signal to receiver going forward, left and right.

Refer to the circuit design, the circuit description is listed as below:

- Y1, Q2 and associate circuit act as oscillator.
- U1 and associate circuit act as encoder.
- Q4, L3 and associate circuit act as RF amplify and filter.
