Sailor Maritime VHF radio telephone RT5022

Operational description

RT5022 is a two-way mobile maritime VHF transceiver with built in DSC functionality. It is a simplex/Semi-Duplex radio.

The operational frequency range is from 149.3 – 163.75MHz

The transmitter delivers 25 W power which can be reduced to 1W.

RT5022 has two separate receivers. One for voice communication and one for DSC reception.

RT5022 is front-operated with push buttons and a large display. Volume and Squelch can be adjusted with wheel knobs.
