Overview

This application is for original approval of a Wireless Interface assembly utilizing a Bluetooth 4.0 EDR and LE radio to control a mechanical lockset for commercial applications. The Model WTI SMART employs a Murata radio chip LBMA1BGUG2-555 and ceramic chip antenna mounted permanently to the pcb.

Confidentiality requested for allowed files. Request is properly addressed and referenced.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
