RE: Confidentiality Request

Dear Reviewer:

This letter is a request for confidentiality for specific exhibits in reference to the GE Security filing for the Container Security Device (CSD) under the FCC ID: TCZ-ATT10102-1

The following exhibits are requested to be held in confidentiality and withheld from public inspection pursuant to 47 CFR 0.457(d):

Schematics
Block Diagrams
BOM
Internal Photos

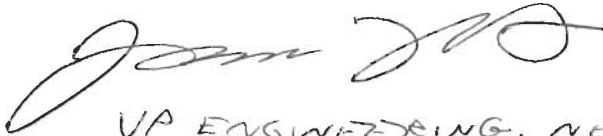

These exhibits contain details of the proprietary operation of the product. These details are not readily discernible from the hardware, constitute trade secrets, and are not generally accessible by the public.

The internal photo request is justified by the fact that the unit is hermetically sealed in potting material and is not easily disassembled.

We request that the above documents and this letter be withheld from public inspection.

Please contact us if further justification for any of the above exhibits is necessary.

Sincerely,

 6/9/2005
