This report is for your exclusive use. Any copying or replication of this report to or for any other person or entity, or use of our name or trademark, is permitted only with our prior written permission. This report sets forth our findings solely with respect to the test samples identified herein. The results set forth in this report are not indicative or representative of the quality or characteristics of the lot from which a test sample was taken or any similar or identical product unless specifically and expressly noted. Our report includes all of the tests requested by you and the results thereof based upon the information that you provided to us. You have 60 days from date of issuance of this report to notify us of any material error or omission caused by our negligence, provided, however, that such notice shall be in writing and shall specifically address the issue you wish to raise. A failure to raise such issue within the prescribed time shall constitute your unqualified acceptance of the completeness of this report, the tests conducted and the correctness of the report contents. Unless specific mention, the uncertainty of measurement has been explicitly taken into account to declare the compliance or non-compliance to the specification

#### 1. CERTIFICATION

PRODUCT: AC750 Wi-Fi Range Extender

BRAND NAME: tp-link

MODEL NO.: RE205

**ADDITIONAL MODEL: N/A** 

FCC ID: TE7RE205

**TEST SAMPLE:** ENGINEERING SAMPLE

**APPLICANT:** TP-Link Technologies Co., Ltd.

**TESTED DATE:** May 07, 2017

**STANDARDS:** FCC Part 2 (Section 2.1091)

KDB 447498 D01

**IEEE C95.1** 

#### 2.RF EXPOSURE LIMIT

#### LIMITS FOR MAXIMUM PERMISSIBLE EXPOSURE (MPE)

| FREQUENCY<br>RANGE (MHz)                              | ELECTRIC FIELD<br>STRENGTH (V/m) | POWER DENSITY<br>(mW/cm²) | AVERAGE TIME (minutes) |    |  |
|---|----------------------------------|---------------------------|------------------------|----|--|
| LIMITS FOR GENERAL POPULATION / UNCONTROLLED EXPOSURE |                                  |                           |                        |    |  |
| 300-1500  |                                  |                           | F/1500                 | 30 |  |
| 1500-100,000  |                                  |                           | 1.0                    | 30 |  |

F = Frequency in MHz

#### 3. MPE CALCULATION FORMULA

 $Pd = (Pout*G) / (4*pi*r^2)$ 

where

Pd = power density in mW/cm<sup>2</sup>

Pout = output power to antenna in mW

G = gain of antenna in linear scale

Pi = 3.1416

R = distance between observation point and center of the radiator in cm

#### 4. CLASSIFICATION

The antenna of this product, under normal use condition, is at least 20cm away from the body of the user. So, this device is classified as **Mobile Device**.

Tel: +86 769 8593 5656 Fax: +86 769 8593 1080

Email: customerservice.dg@cn.bureauveritas.com

### 5. ANTENNA GAIN

The antennas provided to the EUT, please refer to the following table:

| Frequency<br>Band | Antenna 0<br>Peak Gain<br>(dBi) | Antenna 1<br>Peak Gain<br>(dBi) | Total Gain<br>(dBi) | Antenna<br>Type |
|-------------------|---------------------------------|---------------------------------|---------------------|-----------------|
| 2.4GHz            | 2                               | 2                               | 5.01                | Dipole Antenna  |
| 5GHz              | 3                               | /                               | 3                   | Dipole Antenna  |

#### 6. CALCULATION RESULT OF MAXIMUM CONDUCTED POWER

| FREQUENCY<br>BAND<br>(MHz) | MAX POWER (mW) | ANTENNA<br>GAIN<br>(dBi) | DISTANCE<br>(cm) | POWER<br>DENSITY<br>(mW/cm²) | LIMIT<br>(mW/cm²) |
|----------------------------|----------------|--------------------------|------------------|------------------------------|-------------------|
| WLAN 2.4GHz                | 182.390        | 5.01                     | 20               | 0.115010                     | 1.0               |
| WLAN 5GHz                  | 149.279        | 3.0                      | 20               | 0.059255                     | 1.0               |
| WLAN 2.4GHz<br>+WLAN 5GHz  | 331.669        | 5.01                     | 20               | 0.174265                     | 1.0               |

#### **CONCLUSION:**

Both of the WLAN 2.4GHz and 5GHz can transmit simultaneously, the formula of calculated the MPE is:

 $CPD_1/LPD_1 + CPD_2/LPD_2 + \dots etc. < 1$ 

**CPD = Calculation power density** 

**LPD** = Limit of power density

Therefore, the worst-case situation is 0.115010 / 1 + 0.059255 / 1 = 0.174265, which is less than "1". This confirmed that the device comply with FCC 1.1310 MPE limit.

--- END ---
