

## Description of Permissive Change

The report is prepared for FCC class II permissive change. The device hardware and digital circuitry are identical with original certified. The differences compared with original report are listing as below:

1. Converting the DTS filing from 15.247 to 15.407 under new rule
2. Updating U-NII-3 filing to under new rule.
3. The device does not support TDWR.
4. The device, which approved under the Old Rules will not be marketed, imported or sold to United States during the time after June 1, 2016.
5. Updating software and not affecting the RF parameter. We had used new software to test DFS and upload report to you.

Please refer to test reports for more details about the test items.
