RE: Additional comments due to original responses for FCC ID: TE7WN310G_ATCB004856
Attention: Sai Li

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that page 5 of the SAR report lists 2412 to 2483MHz. Please note that this is not a legal band of operation for this device in the US. Please correct the SAR report page to show the proper frequency band of operation (i.e. 2412-2462MHz).
2. Please note that the new report shows the exact same SAR values even though the power levels listed are up to 2+dB difference. Please explain how this is possible and please properly address items 1 of the original comments letter. Please see page 20 of the revised and original SAR reports.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
