RE: ATCB005311

FCC ID: TE7WN353G

I have a few comments on this application. Depending on your responses, kindly understand there may be additional comments.

1. Test report

The spectrum plots at page 96, 97 on conducted band edge emission measurement show the emission level outside frequency band does not meet the requirement.

Page 96: 802.11g ch1 : $2.61 - (-17.12) = 19.73\text{dB}$,

Page 97: 802.11g ch11: $2.4 - (-17.32) = 19.72\text{dB}$,

The above emission level is not 20dB at least below the high level in the operating band.

Please clarify it.

2. Short of MPE report

It is required to provide a MPE (Maximum Permissible Exposure) report for the wireless 802.11b/g device operating distance from body is greater than 20cm.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
