RE: ATCB005300

FCC ID: TE7WR340G

I have a few comments on this application. Depending on your responses, kindly understand there may be additional comments.

1. User manual

It is required to place the information to user to your user manual under FCC part 15.21

Below please see the statement copied from FCC part 15.21 for your reference:

“The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.”

2. Test report

The reading level on RF radiated measurement at page 99 of the test report is -1.666 dBuV. It should not be such low level.

Please clarify it.

3. Test report

It is not clear to see if the emission level of marker2 has 20dB below that of marker 1 from page 94 ~97 on conducted band edge emission measurement..

Please provide spectrum plots that show better band edge point.

4. Short of MPE report

It is required to provide a MPE (Maximum Permissible Exposure) report for the wireless 802.11b/g device operating distance from body is greater than 20cm.

5. Form 731

Your external photos provided for this application is a “54M wireless router” device.

Please check if “54M wireless cardbus adapter” filled at 4(a) on “TE7WR340G_731 form” is correct?

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
