Ref: FCC ID: TE7Y5SV1 label location justification

Gentlemen:

TP-LINK Technologies Co., Ltd. requests acceptance of the labeling proposal described below for Smart Phone bearing FCC identifier TE7Y5SV1

The subject Smart Phone are compact handheld models as shown in figure 1, authorized under 47CFR Part 22H&24E for mobile services.

Figure 1

Because the majority of the cell phone housing is composed of display, speaker, operating controls and a removable back cover, there is extremely limited space available to attach the required label carrying the FCC identifier. Attaching the label to the back cover is not acceptable because the back cover is a removable item. For this reason, TP-LINK Technologies Co., Ltd. proposes placing the label carrying the FCC identifier inside the cell phone (under back cover) as shown in figure 2.

Figure 2

The consumer packaging for these models is a "gift box" which does not allow the transceiver to be seen at time of purchase. In order to meet the requirements of 47CFR Part 2.925 (d), TP-LINK Technologies Co., Ltd. will add the FCC identifier "TE7Y5SV1" to the outside of the consumer "gift box" packaging.

Thank you for your attention to this matter.

Yours Sincerely,

Wu Xuewen
Certification manager
Shenzhen BALUN Technology Co., Ltd.
