Re: FCC ID: TEB-HUNTGS10122

To Whom It May Concern:

The following application is submitted on behalf of our client, Hunt Technologies, Inc., for evaluation of their model 10122 for certification under FCC Part 15.247 for a single modular approval.

The 10122 module is a daughter board module, manufactured by Hunt Technologies, Inc. that plugs into a GE KV2C metrology circuit board. Model 10122 contains two separate radios: a 900 MHz ISM band frequency-hopping spread spectrum (FHSS) transceiver and a 2.4 MHz ISM band transceiver employing 802.15.4/ZigBee, each of which was evaluated separately to the corresponding rules and found to be in compliance.

Both radios can transmit simultaneously therefore the device was also evaluated for radiated inter-modulation products and found to be in compliance.

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Sam Wismer'. The signature is fluid and cursive, with the first name 'Sam' being more prominent.
