RE: Laipac Technology Inc.

FCC ID: TET-NETGUARD11

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Please review your Operational Description. I am looking for a circuit level description of how RF energy is created, modulated and amplified. This obviously occurs within the RF module. Please provide a description of what happens inside this device.
- 2.) I still do not have a Block Diagram of the RF portion of the remote controller. In many ways the Operational Description and Block Diagram illustrate the same process. Please provide a Block Diagram of the RF portion of this device.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
