

RF Technical Information:

Type of Evaluation (check one)	X	SAR Evaluation: Device Used in the Vicinity of the Human Head
		SAR Evaluation: Body-worn Device
		RF Evaluation

Between 2.2GHz and 3.0GHz the limit is 20 mW before SAR testing is required. This device has a maximum EIRP of 19.95 mW. As 19.95 mW is below the limit of 20 mW, no SAR testing is required.
