

LS RESEARCH, LLC

Wireless Product Development

June 26, 2013

To: FCC and Industry Canada

This letter is a request for a FCC Permissive Change and IC Reassessment to add an antenna to model TiWi-BLE and TiWi-R2 to the existing FCC and Industry Canada filing having FCC ID: TFB-TIWI1-01 and IC: 5969A-TIWI101.

The request for reassessment is only for models: TiWi-BLE and TiWi-R2 as TiWi-R1 has reached End of Life and been obsoleted. As result reassessment is not necessary for TiWi-R1.

The summary of change to model TiWi-BLE and TiWi-R2 for the permissive change request:

1. Addition of Taoglas FXP.831 Freedom 2.4/5 GHz Ground Coupled Antenna
2. No changes have been made to the RF hardware

With the addition of the Taoglas antenna, it is our request that this permissive change condition be added to the existing product certifications.

Sincerely,

A handwritten signature in blue ink, appearing to read 'William Steinike', with a long horizontal flourish extending to the right.

William Steinike
President of LS Research
