

Tune-Up Procedure Description

Uniform Industrial Corp.

FCC ID: TFJTS890G

47 CFR 2.1033(c)(9): Tune-up procedure over the power range, or at specific operating power levels.

Tune-up Procedure:

1. Set the device to operational voltage and on a predefined band class and channel.
2. The maximum output power is measured when the power control is set as Tx power Max.
3. The Tx output power will be adjusted equal or lower than tested power shown in as below tables.

WCDMA:

Frequency bands UMTS/HSPA+:

Triple band, 850 (BdV) / AWS (BdIV) / 1900MHz (BdII)

Band V : 824~849 MHz

Band IV : 1710~1755 MHz

Band II : 1850~1910 MHz

Output power

Class 3 (+23.5dBm +1/-3dB) for UMTS 1900,WCDMA FDD BdII

Class 3 (+23.5Bm +1/-3dB) for UMTS AWS, WCDMA FDD BdIV

Class 3 (+23.5dBm +1/-3dB) for UMTS 850, WCDMA FDD BdV
