RE: Label Position and how it will be affixed to the Device

FCC ID: TFT-RM100

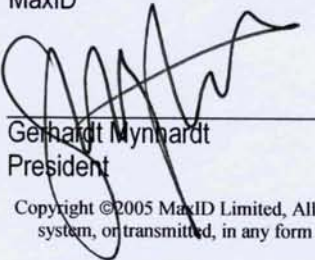

This is to specify the label position on the RM100. See pictures below.

The FCC label is made of White Vinyl with a High tack self-adhesive polymeric with permanent acrylic pressure sensitive adhesive to attach the label on the RM100 module.

The label is mounted on the side of the metal housing and cannot be removed without damaging the label or the housing. The label was designed to last just as long as the expected lifetime of the RM100 module.

Yours faithfully
MaxID
