

To whom it may concern:

We,

Company Name: TiVo Inc.

Address: 2160 Gold St., Alviso, CA95002 USA

City: Alviso

Country: United States

Declare that:

The TiVo 802.11N adapter model name: AN0100 / FCC ID: TGN-AN0100 has two modes of operation:

- 1) Client also known as 802.11 station mode (Slave)
- 2) Bridge also known as 802.11 AP/Infrastructure mode (Master)

The mode of operation is selected by a physical switch located on the bottom of the adapter.

In client (slave) mode, the TiVo 802.11N adapter has no support for

- 1) radar detection
- 2) ad hoc mode (Non-associated mode).
