Request for Modular Approval

Transmitter Module Characteristics per FCC public notice DA 00-1407 requirements

Item	Requirements	EUT
1	Have its own RF Shielding	The module has its own shielding. Refer to external photos.
2	Have buffered modulation/data inputs (if such inputs are provided)	No such design for this FM transmitter module.
3	Have its own power supply regulation	This module does not contain an on-board voltage regulator. The transmitter is specified to operate across a voltage range of +5V +/-0.2volt.
4	Meet the antenna requirements of Section 15.203	The antenna is soldered to the module, no consideration of replacement. Refer to internal photos.
5	Be tested in a stand-alone configuration, i.e., the antenna, AC or DC power and data input/output lines must be connected to the module but, the module must not be inside another case during testing	The module was tested outside the host device as stand-alone configuration. Refer to setup photos.
6	Be labeled with its own FCC ID number, and if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module	The module will be labeled with its own FCC ID, and when installed inside another device, the outside of that device will also display a label referring to the enclosed module.
7	The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization. For example, there are very strict operational and timing requirements that must be met before a transmitter is authorized for operation under Section 15.231. For instance, data transmission is prohibited, except for operation under Section 15.231(e), in which case there are separate field strength level and timing requirements. Compliance with	The module operates under FCC 15.239.

	these requirements must be assured.	
8	<p>Address compliance with the Commission's RF exposure limits in Sections 1.1310 and 2.1093.</p> <p>In addition, spread spectrum transmitters operating under Section 15.247 are required to address RF exposure compliance in accordance with Section 15.247(4)</p>	Complies with RF exposure limits.
