In response to your comments regarding the application for certification of the device referenced above please find our response below:

1.) Users Manual must have Pt. 15.21 statement.

*The Users Manual has been updated to reflect the Pt. 15.21 statement.*

2.) Modular Approvals need to have power line conducted test included as there are no guarantees that the end user will not connect to power grid. This can be accomplished using any store bought power converter.

*Conducted Emissions testing has been completed. The test report and test setup photos have been updated.*

3.) Question 7 in modular approval letter is not in the user manual. Please revise user manual.

*The Users Manual has been updated to address Question 7.*
