RE: FCC ID: TJB-ATEQ-VTXX_ATCB003396
Attention: Gregory M. Snyder / Brian J. Dettling

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the FCC ID number is required to be on one line. Please note 47CFR 2.925(a)(1) states, "(1) FCC Identifier consisting of the two elements in the exact order specified in §2.926. The FCC Identifier shall be preceded by the term *FCC ID* in capital letters on a single line, and shall be of a type size large enough to be legible without the aid of magnification." Please correct the FCC ID label to be in line with the requirements of part 2.925 of the FCC rules. Please note the IC number should also be on one line. Please correct this as well.
2. Please note that I do not speak French so I have no idea what the schematics say. If available, please provide an English version for the schematics of the transmitter being certified. Otherwise, please explain the schematics.
3. Please note that the manual is for a TPM-RKE ANALYZER 9936. The application is for a VT60. The manual only mentions VT60 in a couple places under section 9 (i.e. Bootstrap VT60). Please explain.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
