Summation of RF Exposure Calculation:

When all the antennas are at least 20cm away from the user, but individual antennas <u>can not</u> be separated by 20cm from each other.

$$\frac{0.531116\frac{mW}{cm^2}}{0.61\frac{mW}{cm^2}} + \frac{0.123803\frac{mW}{cm^2}}{1\frac{mW}{cm^2}} = 0.9945$$

$0.9945 < 1$

Therefore, the device complies with FCC's RF radiation exposure limit for general population for a mobile device.
