Class II Permissive Change (C2PC) Letter

Date: 06/17/2022

Subject: Class II Permissive Change for FCC ID: TK4WLE1216V520

To whom it may concern:

We Compex Systems Pte. Ltd., hereby authorize Timco Engineering Inc. to assist us with Class II Permissive Change filing for model WLE1216V5-20 bearing the FCC ID: TK4WLE1216V520.

The purpose of this C2PC is to include the following RF chipset: **QCA9994**, into our original FCC filing.

The included RF chipset is a variant of the same **family of product**, and use identical radio/MAC/BB, having identical pinouts, and RF parameters, as per the originally filed RF chipset QCA9984.

Both QCA9984 and QCA9994 have outputs of up to -3dBm at 2.4GHz and -1.6dBm at 5GHz.

They need external Front End Modules to perform the transmitting function.

We confirmed that there is no change in the RF characteristic based on the original grant approved by the FCC Commission, and the following conditions are met:

1. The originally certified product must be a 4x4 design.
2. The change is limited to swapping in the specified alternate chip. No other changes to BOM/Schematics/PCB are made.
3. Identical WLAN functionality as per granted by FCC Commission in the original filing is maintained via factory configuration.

Compex Systems Pte. Ltd.

No. 9 Harrison Road, Harrison Industrial Building, #05-01, Singapore 369651

Compex Systems Pte. Ltd.

Phone: (+65) 6286 2086

Fax: (+65) 6280 9947

4. The C2PC is for a limited modular approval device with equipment class NII and DTS. The module is tested in stand-alone operating configurations (i.e., no host/no SAR).

Current Chip:

QCA9984

Equivalent/Alternative (Pin to Pin Compatible)

QCA9994
