Subject: AsiaRF Ltd., FCC ID: TKZAWUHG2402, Assessment NO.: AN06T5703, Notice#1

Question #1: Based on antenna specification, the polarization that yields highest antenna gain is linear, vertical. The user manual also indicates the device should be either window mounted or desktop mounted. However, the test setup photos does not show the worst case has been investigated. Please retest radiated emission test and restricted bandedge test when the device is placed in vertical position.

**Ans:** [Please refer to the revised the test report and test setup photos as attachment.](#)

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
