Subject: FCC ID: TLV-WPO1000

Mr. Fujimoto:

In order for processing of this application (FCC ID: TLV-WPO1000) to continue, the following issue(s) will have to be addressed:

- 1) Since the FCC label for the device does not contain the verbiage required by 15.17(a)(3) of the rules, it must be included in the user's manual. Please submit a revised manual.
- 2) According to the operational description and schematics, this device is normally powered by a 12 Volt motorcycle battery, or the 12 Volt power bus on a motorcycle. The test report states that the device is only battery powered, and that during tests, the power was supplied by four (4) AA batteries (6 VDC). Please explain. Also, since the device may be powered by the motorcycle power bus as well as a battery, please indicate whether the device complies with the voltage variation requirements contained in 15.31(e) of the rules.

The item(s) indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 60 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Please upload responses and/or exhibits to the electronic filing website. Your correspondence number is TLV-WPO1000-1.

Best regards,

Scott McCutchan
