**Overall Assessment Letter for Bluetooth Module, Model No. AW-BT253
FCC id: TLZ-BT253**

I have reviewed this Class 2 Permissive change and find it compliant.

This is an application to permit installation of this module in host Laptops which include other Radio Modules which can co-transmit with this module.

Please note the following:

1. The maximum power is 1.5mW and the client has stated that the distance between the Bluetooth antenna and other simultaneous transmitting antenna is greater than 20cm. According to KDB 447498 SAR evaluation is not necessary.

I underwent the FCC RF exposure training with the FCC in October 2008.

Yours sincerely

A handwritten signature in blue ink that reads 'Allen Ferry'.
