MF4100 Contactless Copy, Activity and Laundry Reader

Blackboard transact™

The Blackboard MF4100 Contactless Multi-function Reader is the first commercially available multi-function reader to incorporate both contactless and mag stripe reader capabilities for the North American higher education market. The feature-packed MF4100 also supports full video playback allowing for a rich video experience for advertising, alerts and notifications, and other special messages via a full color touch screen.

Product Features:

- Contactless and mag stripe reading capabilities
- Contactless smart card support for Sony FeliCa
- Secure microcontroller for encryption and secure communication
- Full color touch screen
- Wired and Wireless Ethernet support
- Media player capabilities supporting Windows Media Player
- Ability to change media messages in the reader from the host "on the fly" without rebooting
- Built-in secure web server for remote administration and configuration

No other reader of any kind currently available to the North American higher education market offers all of these capabilities in one simple powerful package.

For more information on the Blackboard MF4100 Contactless Multi-function Reader please contact your Blackboard sales representative.
