Tune Up or Alignment Procedures

There are no Tune-up or Alignment procedures for the PS4101.

The antenna for the Near Field Communication, 13.56 MHz is a loop antenna integrated on the printed wiring board (PWB). The PWB is mounted in the enclosure in a pocket with adhesive. The radio transceiver is an NXP PN532 device and has fixed output power. The antenna consists of three loops and measures 1.6" x 3.0".
