# Declaration Letter

FCC ID: TOR-W68   Date: 2015.2.9

Even though the user can try to set the transmit power to be 30dBm, the system will not allow the AP to transmit beyond the allowed in the reg-domain. Please see the attached screen shot of the configuration screen.

Please note that the transmit power is the least of

- Value specified in the configuration screen
- Maximum allowed in the regulatory domain
- Maximum supported by the radio

*Country code and the output power to be set only by the manufacturer, the end-user is not authorized to modify.
