Re: CyberTracker Class 2 Permissive change

FCC ID: TRX-CYTRIDN001

Originally the CyberTracker product was certified with an integrated antenna. The applicant would like to market a version of this product that is equipped with an external antenna. This is the only change made to this product.

Previous Certification	Current Application
Internal/integrated antenna assembly	External antenna connector

Test data is supplied to demonstrate that the new configuration complies with FCC Part 2 and Part 90 requirements.

As the ERP of the device is less than 1.5 Watts, the device continues to comply with FCC MPE requirements.

A handwritten signature in blue ink, reading "Andrew Marles".
