

Marking Drawing

Rev. Date: 2005-11-14	Rev. 4.0	Document No. 105038
Prepared by: Agnar Kopperud	Subj. Resp.: Agnar Kopperud	Approved by: Ole Christian Sørli
BGAN Class 3 - Antenna Unit Label for s/n printing		

Document Size = A4
Scale : See scaling indicator

Printinting colours (as shown in figure):

- Black = Pantone Process Black
- Light grey = Pantone Cool Grey 4 C
- Dark grey = Pantone Cool Grey 11 C
- Label base colour = White
- Fonts used = Vectora LH (outlines created - font independent)
- = Norma (outlines created - font independent)
- Label corners = Radius 1 mm

Observe !

The actual barcodes are to be printed during assembly process of antenna unit itself.
No preprinting of barcodes / subnumbers. The bar code symbology is Code 128-B.

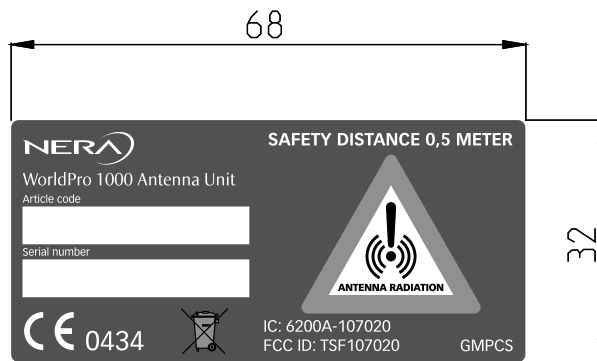

Bar code field information:

- Article code = 102210
- r.r = Revision from PDM system
- ww = Manufacturer ID
- yymm = Actual year and month
- xxxx = Consecutive (serial no.) numbers incremented from 0001, starting at 0001 each new month.

Observe !

The complete serial number should be printed in a continuous sequence without notes of conjunction, or spaces. (wwyymmxxxx)

Preprinted label layout / graphic:

Example showing label after printing of bar codes:
